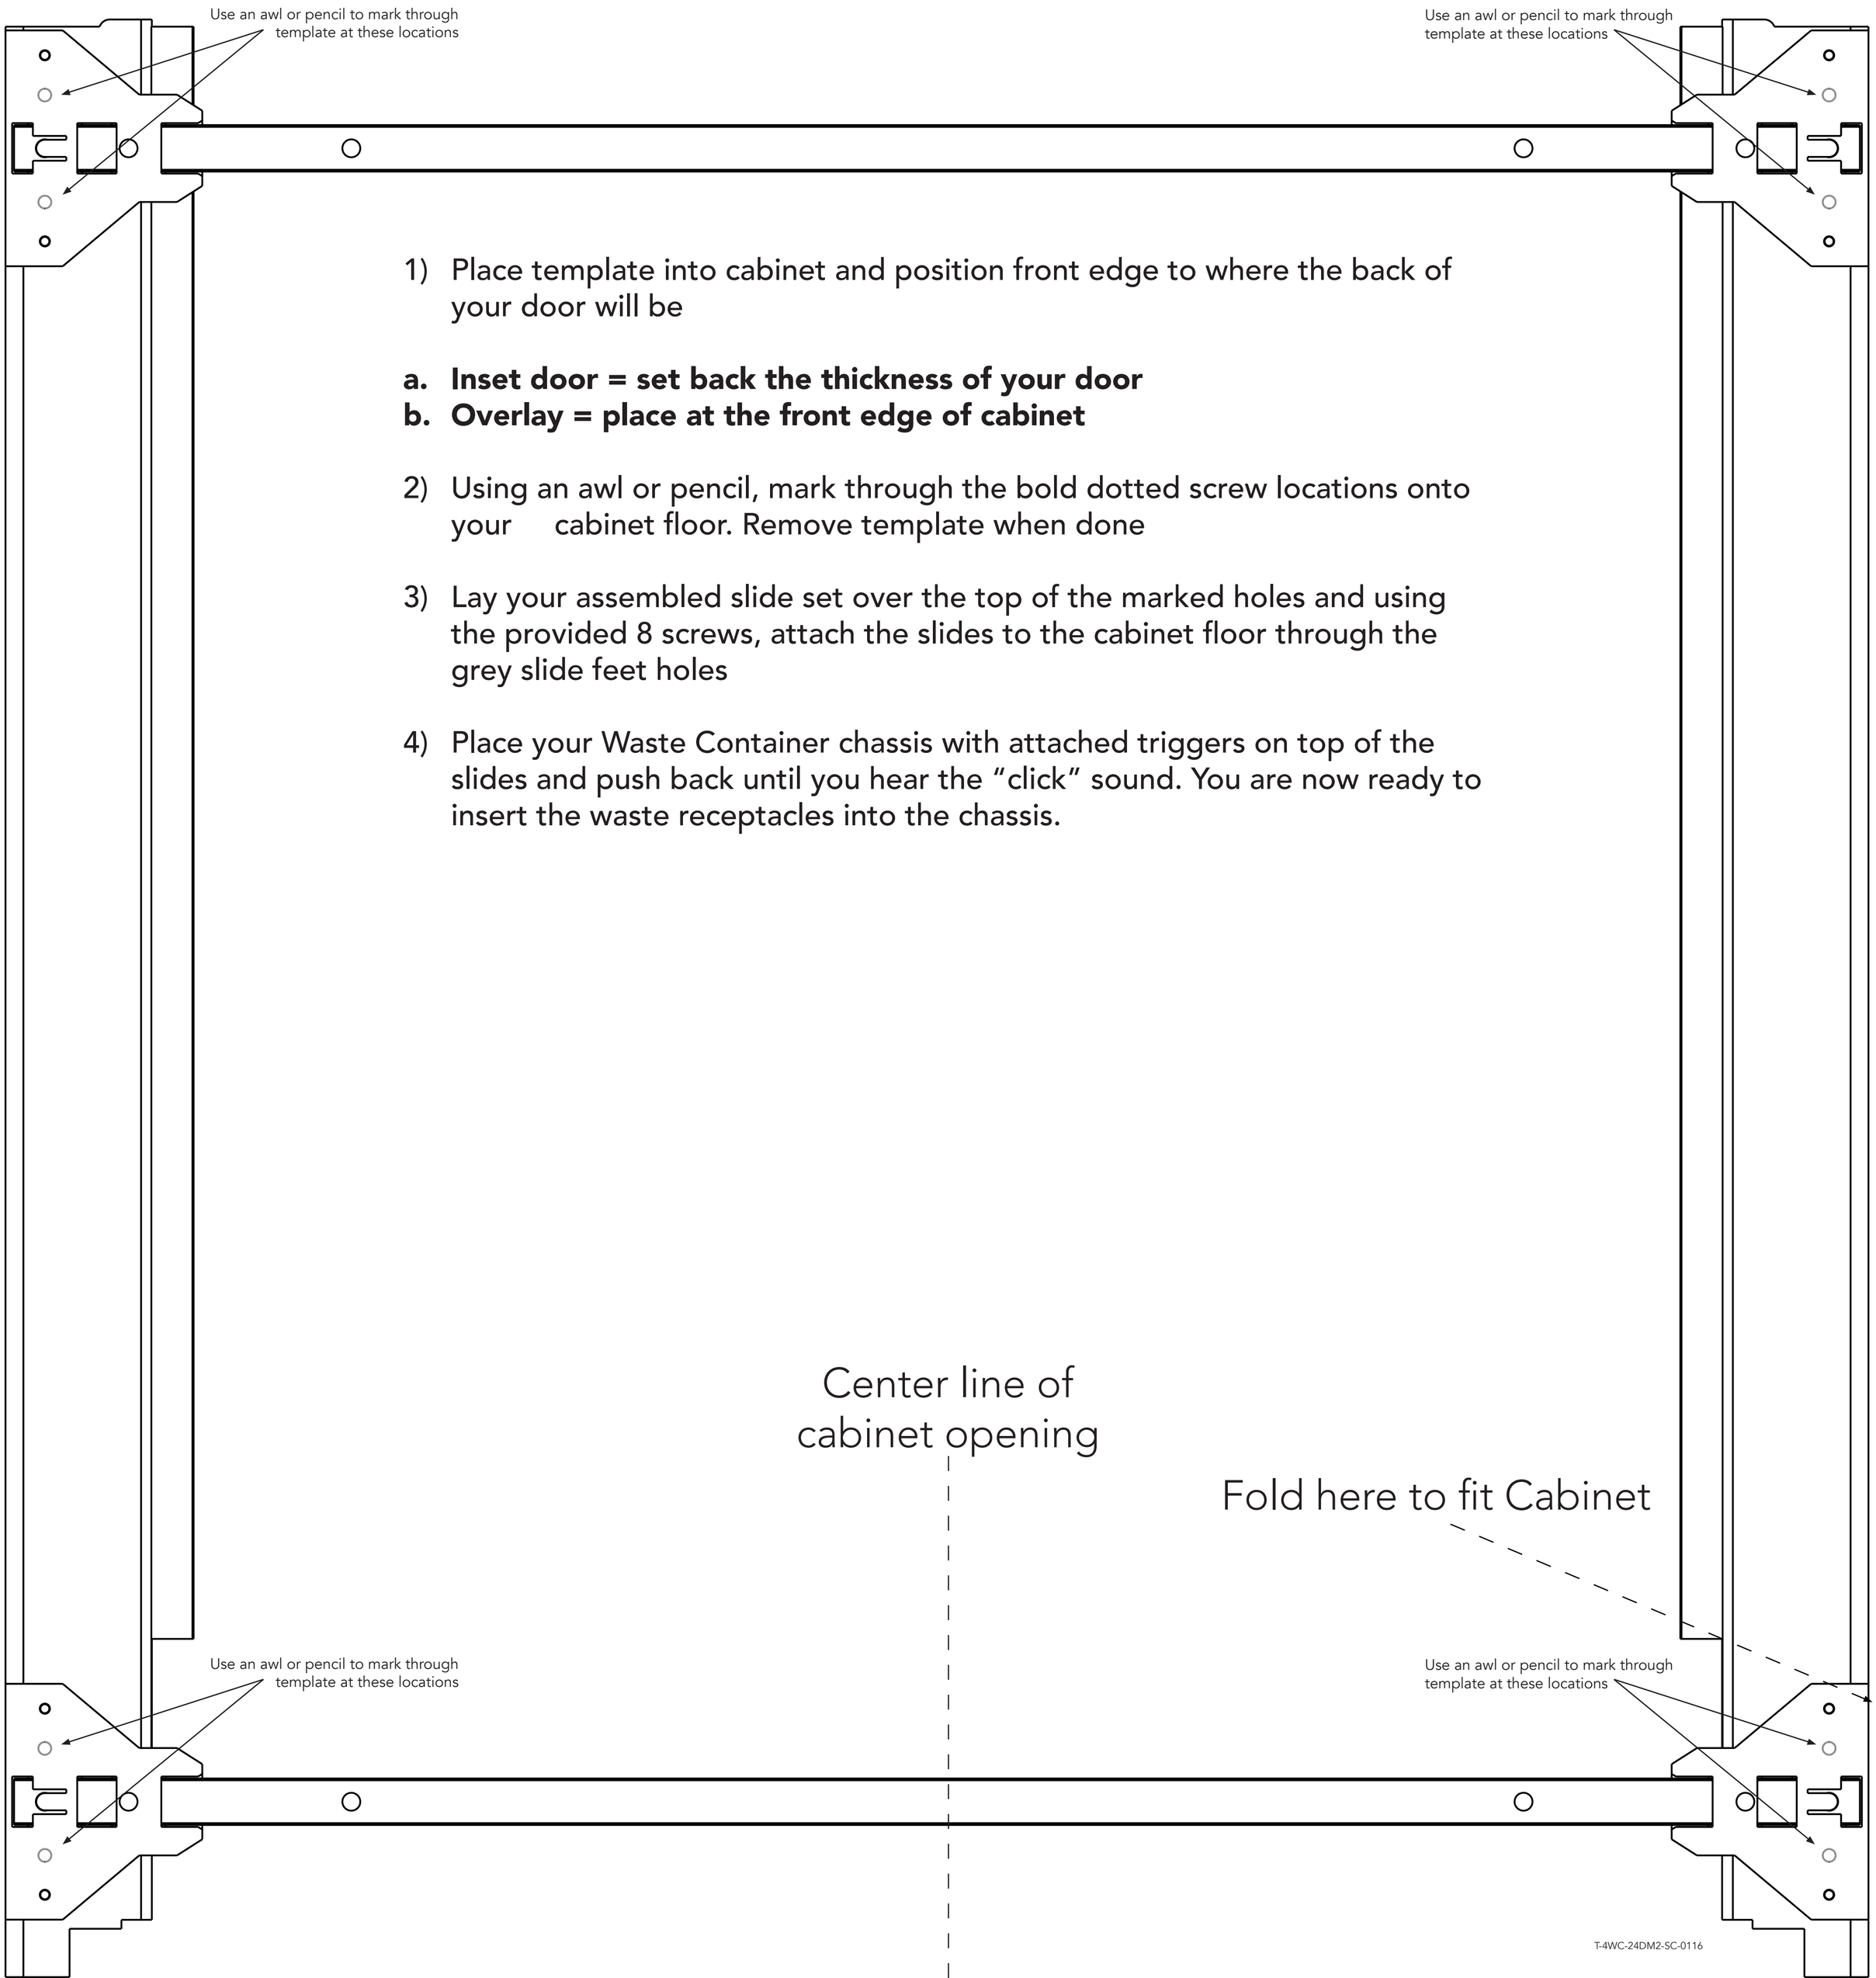
4WC DOUBLE 30QT WASTE CONTAINER W/ BLUM SOFT-CLOSE TEMPLATE



1) Place template into cabinet and position front edge to where the back of your door will be

a. Inset door = set back the thickness of your door
b. Overlay = place at the front edge of cabinet

2) Using an awl or pencil, mark through the bold dotted screw locations onto your cabinet floor. Remove template when done

3) Lay your assembled slide set over the top of the marked holes and using the provided 8 screws, attach the slides to the cabinet floor through the grey slide feet holes

4) Place your Waste Container chassis with attached triggers on top of the slides and push back until you hear the "click" sound. You are now ready to insert the waste receptacles into the chassis.
