**1U Swing Type Hinged Wall Mount Bracket, Extendable Depth**

Rackmounts are manufactured to organize your network and/or professional computer system in a clean efficient manner, however if the number of rackmounts used are minimal, PI Manufacturing's hinged wall mount bracket may be the more optimal choice. These wallmounts are come in different sizes and are capable of mounting a number of panels. These particular wallmounts feature 1U in height, a swing type which uses a hinge on one side to provide access to the back of the panel without taking down the wall mount, and slide rails that allows for an extendable depth. With the use of these wallmounts, your networking system becomes more sophisticated and more organized.

- Features
- Hinged Type
- Swing Type
- 1 Unit
- Extendable depth
- 9.25" to 14" depth when securing with two screws on each side
- 14.5" maximum depth if using only one screw per side
