

# Art Requirements for Garment Bag Printing

To print your logo we require **camera ready black and white artwork**. We would prefer vector artwork instead of Bitmap artwork. Logos may be emailed as one of the following file formats: .ai, .pdf, .psd, .eps or .tiff. Logo must be supplied at 300 dpi and 6" x 6".

A scan, photocopy or fax of your logo is not good enough.

If a hard copy is all that is available, we will take it, but there may be a fee to correct the artwork.

Black & White art supplied digitally is the best format to ensure printing perfection.

Too much detail in the line drawings will not print properly and will fill in during printing.

Final garment bag art may appear as a solid blob.

Bad example

good example

Best example

Artwork that has drop shadows, 3-D embossing effects or any other photoshop effect, although elegant in 4-color printing, will not print.

Artwork that has solid black in it, may also not print properly. Large blocks of ink have a tendency to crack and peel off garment bag over time.

Artwork that has solid black lettering or graphic on white background work the best.
