Original Products That Make Pools Better

Original Products That Make Pools Better

Being A Gladon Customer Has Its Advantages

High Quality Products

Gladon has been manufacturing and selling our high quality products for over 35 years. At Gladon, we believe you get what you pay for. We all know that cheap, inferior products don't perform as they should, don't last, and end up costing more in the long run. Let's face it, isn't the satisfaction of completing a job smoothly and quickly without customer complaints worth it?

Superior Service

We invented Pool Cove™ and HappyBottom® Pool Pad. Gladon also pioneered other foam products for swimming pools. Our extensive experience with foam products allows us to provide the most knowledgeable support in the industry for these products. Everyone at Gladon is focused on serving all of our customers' needs. At Gladon, we're here to make sure you get what you want when you need it. Call us and get the service you deserve! Real people, real help. Experts are available to take your calls from 8:30 AM until 5:00 PM Central Time.

Exceptional Value Promise

Think you have found a better price? Contact us and we will offer you a comparable product at a competitive price. Gladon always provides high quality products and exceptional value. That is our promise to you.

We Stock What We Sell

Gladon stocks its complete line of pool products for prompt shipment. We know that our customers can't afford to delay installations waiting for products to arrive, especially during the peak of the pool season.

Fast Shipping

Gladon offers the fastest shipping in the business. Over 99% of the orders are shipped the same day. If you really need to receive an order fast, we offer next day air or second day air service. Of course, our commitment to quality means we only deal with reputable shipping companies that are financially sound and offer quality service.

Low Shipping Costs

We all know that the numbers on a price sheet don't reflect the total cost of a product. At Gladon, we work to save you money on the bottom line. Our traffic department checks all available shipping methods and selects the least expensive. That's why no matter how your order is shipped; common carrier, UPS, FedEx or air service, you can be sure that you will incur the lowest shipping costs possible.

Guaranteed Satisfaction

Another example of Gladon's commitment to its customers is our satisfaction guarantee. If for any reason you are not completely satisfied with any of our products, or they do not perform to your expectations, we will make it right.

A Gladon customer is a satisfied customer!

The Original Cove™

All above-ground pools need a cove.

Read any pool manufacturer's installation instructions and you will see: "The cove is a vital structural element of your pool." For over 30 years, Gladon dealers have recognized this fact and have stopped sending their customers and profits to the sand/gravel/topsoil people. By including Gladon Pool Cove in pool packages or by offering it as an add-on item, Gladon dealers have increased profits significantly, without expanding their customer base. In addition to profits, customer satisfaction is also increased. Liner failures due to cove washout will be eliminated. Do-it-yourself customers will thank you for selling them a product that will save hours of backbreaking work, and provides professional results.

Installation crews can increase productivity and eliminate call backs simply by using Gladon Pool Cove. **The time has come to provide your pool customers with a product they really need and want, Gladon Pool Cove!**

Gladon Original Cove is a 3 inch by 4 inch preformed cove made from chemically neutral, flexible Polyethylene foam and is safe for use with all pool liners. Lightweight and easy to handle, Gladon Original Cove comes in 48 inch long sections that bend easily without breaking and are compatible with virtually all pool brands. Its unique black plastic backing strip makes it easy to install in all makes of pools. The PVC backing strip locks each section of cove into the bottom rail, allowing it to move as the pool wall expands and contracts. Unlike sand or dirt, Gladon Original Cove can not be washed out and will not hold moisture against metal components. Original Cove reduces corrosion and may add years of life to a pool. Because Gladon Original Cove is made from a high density foam (2.3 lbs/ft³), it will not change shape or indent, making pool cleaning easier. All these valuable features make selling Gladon Original Cove easy and profitable. Available in floor display cartons with individually UPC coded sections.

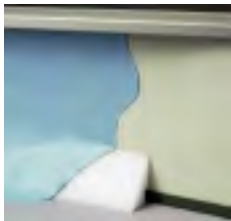

FEATURES:

- Flexible
- Lightweight
- Easy to Clean
- Extends Pool Life
- Installs In Minutes
- Can Not Be Washed Out
- Helps Prevent Corrosion
- Eliminates Liner Failure Due to Cove Washout
- Unique Plastic Backing Strip
- Locks In Pool Bottom
- Best Quality/ Highest Density Foam
- Over 30 years of

Peel N' Place™ Cove

Gladon Peel N' Place Cove is an economical and profitable alternative to sand and dirt coves. Selling Gladon Peel N' Place cove will significantly increase dealer profits. Customer satisfaction will also be increased and liner failures due to cove washout will be eliminated. These valuable features make selling Gladon Peel N' Place cove easy and profitable.

Gladon Peel N' Place cove is a 3 inch by 4 inch preformed cove made from high density (2.3 lbs/ft³), chemically neutral, flexible Polyethylene foam and is safe for use with all pool liners. Lightweight and easy to handle, Gladon Peel N' Place Cove comes in 48 inch long sections that bend easily without breaking and are compatible with virtually all makes of pools. The super tacky adhesive backing is specially designed to adhere to pool walls. When the release paper is peeled off, the adhesive holds the cove sections onto the pool wall until the liner is filled with water.

Gladon Peel N' Place Cove is easy to install in any pool. Just peel off the release paper and place it into position on a clean, dry pool wall. *Note: Ideal conditions may be difficult to achieve depending on weather and the amount of dust generated during ground preparation.* Peel N' Place Cove is sometimes preferred by installers doing liner replacements where sand and dirt has filled the bottom rail, making it difficult to use our Original Cove with a backing strip. The Gladon Peel N' Place design is not a new concept. The adhesive backing feature was included as part of Gladon's original patent. Peel N' Place Cove is available in a colorful, lightweight and shippable floor display carton.

FEATURES:

- Adhesive Tape Backing
- Flexible
- Best Quality/ Highest Density Foam
- Extends Pool Life
- Adheres to Pool Wall
- Can Not Wash Out
- Eliminates Tons of Dirt
- Helps Prevent Corrosion
- Easy to Handle 4 ft. Sections
- Saves Hours of Installation Time
- Eliminates Liner Failure Due to Cove Wash Out

Original Products That Make Pools Better

P O O L C O V E

Peel N' Place™ Blue Cove

Gladon Peel N' Place Blue Cove is an economical and profitable alternative to sand and dirt covers. Selling Peel N' Place Blue Cove to potential new pool customers or existing customers will significantly increase profits. Customer satisfaction levels will also be improved. Expensive call backs for liner replacement and repair due to cove washout will be eliminated.

Gladon Peel N' Place Blue Cove is a 3 inch by 4 inch preformed cove made from a lower density (1.9 lbs/ft³) blue, chemically neutral, flexible Polyethylene

foam, and is safe for use with all pool liners. Lightweight and easy to handle, Gladon Peel N' Place Blue Cove comes in 48 inch long sections that bend easily without breaking. It is compatible with virtually all makes of pools. The super tacky adhesive backing is specially designed to adhere to pool walls. When the release paper is peeled off, the adhesive holds the cove sections onto the pool wall until the liner is filled with water.

Gladon Peel N' Place Blue Cove's lower density foam means you get more air and less resin, thus allowing it to be more economical than our higher density Peel N' Place Cove. The only drawback to lower density is greater compression. This means that the actual size of the cove will become smaller over time due to the force of water pressure constantly on the cove. *Note: For this reason, Peel N' Place Blue Cove may not be the best choice for use in pools with wall heights greater than 48 inches.*

Gladon Peel N' Place Blue cove is easy to install in any pool. Just peel off the release paper and place the cove into position on a clean, dry pool wall. *Note: Ideal conditions for using Peel N' Place Blue Cove may be difficult to achieve, depending on weather conditions and the amount dust being created during ground preparation.* Peel N' Place Cove is preferred by installers doing replacement liner work where sand or dirt has filled the bottom rail. These conditions make it difficult to use a cove with a backing strip that locks into the bottom rail. Peel N' Place Blue Cove is available in a colorful, lightweight and shippable floor display carton.

FEATURES:

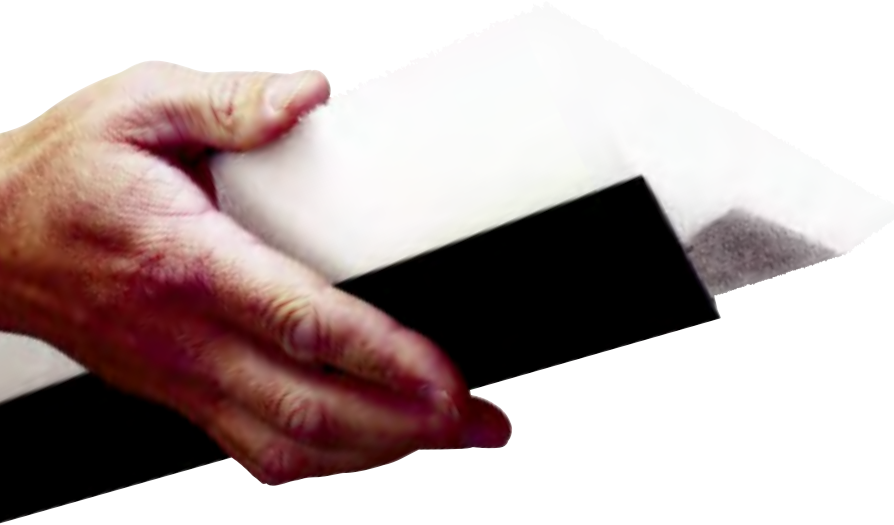

- Flexible
- Economical
- Extends Pool Life
- Lower Density Foam
- Adheres to Pool Wall
- Eliminates Tons of Dirt
- Saves on Installation Time
- Super Tacky Adhesive Backing
- Eliminates Liner Failure Due to Cove Wash Out

Vogue Special™ Cove

Gladon Vogue Special Cove is a 3 inch by 4 inch preformed cove designed specifically to fit Vogue Impact pools. Vogue Impact pools have a unique resin bottom rail that requires a special cutout in the cove. The special cut allows for a fast and easy custom cove installation. Vogue Special Cove is made with chemically neutral, flexible Polyethylene foam, and is safe for use with all liners. The special backing strip allows the cove sections to be locked into the bottom rail where it can move with the pool wall. Because Vogue Special Cove is made from high density foam (2.3 lbs/ft³), it will not change shape or wash out. Available in colorful floor display cartons.

FEATURES:

- Fits Vogue Impact Pools
- Installs In Minutes
- Saves Hours of Installation Time
- Can Not Wash Out
- High Density Foam
- Locking Strip
- Locks In Bottom Rail

STOCK NUMBER	DESCRIPTION	SHIPPING WEIGHT

HappyBottom® Pool Pad

HappyBottom Pool Pad can add years of life to a pool and its liner. Made with special high-density, tough Polyethylene foam, HappyBottom Pool Pad provides a puncture resistant barrier that helps protect a swimming pool's liner. HappyBottom also acts as a vapor barrier to keep corrosion causing moisture away from metal pool components. A soft, smooth, easy to clean pool bottom, with reduced indentations and added insulation are just a few of the many valuable benefits of using HappyBottom Pool Pad. HappyBottom is a registered trademark of the Gladon Company. **If it's not Gladon, it's NOT HappyBottom!**

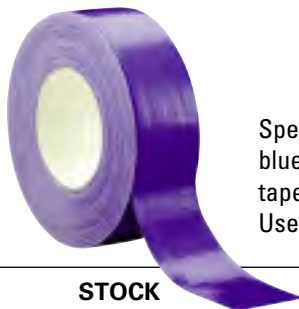

HappyBottom Pool Pad is easy to install. First, roll out sections of the pool pad and cut them into pieces one foot longer than the longest dimension of the pool. Next, seam the 4 ft. wide sections together with Sure Seam Tape. Finally, flip the pool pad over so the tape is facing the ground and erect the entire pool on top of the pad. After the pool has been filled with water, trim off the excess pad material around the perimeter of the pool. HappyBottom is available in an easy to handle shippable roll. *We do not recommend using HappyBottom without Gladon Pool Cove.*

HAPPYBOTTOM®
Pool Pad

Also available pre-cut to fit the pool.

Sure Seam™ Tape

Specially designed for use with HappyBottom Pool Pad. This blue, high grade, water resistant tape is the only recommended tape for seaming together sections of HappyBottom Pool Pad. Use of Sure Seam™ minimizes seam failures.

STOCK NUMBER	DESCRIPTION	SHIPPING WEIGHT
SS 260	2" x 180' (60 yds.) Roll	2 lbs.
SS 360	3" X 180' (60 yds.) Roll	3 lbs.

FEATURES:

- Easy to Install
- Extends Liner Life
- Reduces Heat Loss
- Makes Bottom Cleaning Easier
- High Density Low Compression
- May Eliminate the Need for Sand
- Helps Protect Liners from Punctures
- Great for Pool Set Up on Concrete
- Minimizes Corrosion of Metal Components

HappyBottom® Ultimate

HappyBottom Ultimate is our premium pool pad. Made of a super premium cross-linked foam, it is the ultimate in swimming pool floor padding. The cross-linking provides extra resilience and resists flattening, even when used under the liners of pools that have extra high walls. HappyBottom Ultimate is made with the same material used under artificial turf in NFL football fields.

This pool pad can add years of life to a pool and its liner. Used under a pool, HappyBottom creates a puncture-resistant barrier that helps protect the liner. The pool pad also acts as a vapor barrier that keeps corrosion-causing

moisture away from metal pool components. A soft, smooth, easy to clean pool, with reduced indentations and added insulation are just a few of the many valuable benefits of using HappyBottom Pool Pad.

HappyBottom is a registered trademark of the Gladon Company. If it's not Gladon, it's NOT HappyBottom!

We do not recommend using HappyBottom without Gladon Pool Cove.

Also available pre-cut to fit the pool.

FEATURES:

- Eliminates Footprints
- Made With Premium Cross-linked Foam
- Easy to Install

Perfect Pool Bottom™

Finally, a new technology has been developed to improve the way above ground swimming pool bottoms are installed. **PPB 4000** is a hard, flat, impervious polymer material that is placed under your pool to form a smooth bottom and protect the liner. PPB 4000 installs quickly and easily, once you have prepared the site where your pool will be set up. Rocks, stones, nutgrass, and other objects in the ground below your pool can easily puncture unprotected pool liners and cause leaks. Our revolutionary bottom system will virtually eliminate these problems.

PPB 4000 comes with a ten year limited warranty, even though we strongly believe it will outlast most pools.

The **Perfect Pool Bottom** package consists of PPB 4000, pre-cut to fit your swimming pool, packaged with just the right amount of

Gladon's patented **Pool Cove**. Pool Cove is a vital structural element in every above ground swimming pool. Gladon's high quality, light weight, pre-formed Pool Cove easily snaps into place. It eliminates the need to build a cove on site, using tons of sand or dirt. It provides professional results every time. Unlike sand or dirt coves, Gladon's Pool Cove cannot wash out and doesn't hold corrosion causing moisture against the metal parts at the bottom of your pool.

PPB 4000, used together with Gladon PoolCove, creates smooth pool surfaces for the ultimate in cleanability.

Because our new bottom package requires no special skills or tools, do-it-yourselfers can install it using our easy-to-follow instructions.

FEATURES:

- Stops Nutgrass
- Smooth Bottom
- Protects Pool Liner
- No Footprints
- Easy To Install
- Reduces Need For Sand
- Pool Cleaners Work Better
- Chemically Resistant To Acid And Other Chemicals Found In Soil
- Limited 10 Year

Waveless™ Wall Foam

All wall foams are not created equal! Compare Gladon's high quality flat foam to any other's and you can see and feel the difference. Other manufacturers call their 1.5 to 1.7 lb. foam 2.0 lb. Not Gladon! **Waveless Wall Foam** is true density. True density means easier installation and superior protection for pool liners. For use on metal, concrete, or wood to give smooth pool walls and floors. All rolls are protected with a heavy gauge stretch wrap and do not have a core to discard. Do you need special lengths and widths? No problem! Gladon does all of its own slitting and rewinding in house. If it's not Gladon, it's not WaveLess!

Blue Foam Bond™

Gladon Blue Foam Bond spray adhesive was specifically designed for use by the pool professional to bond polyethylene wall foam to a wide variety of surfaces including metal, wood, concrete, and more. Blue Foam Bond adhesive is tinted blue to allow the user to easily see where it has been applied. Gladon Foam Bond is preferred by pool professionals because of its fast tack, high volume lace or web spray pattern, low soak-in, and high bond strength. Blue Foam Bond is releasable, with working times up to 2 hours. This feature allows the user to adjust foam position after tack has developed, unlike other one shot adhesives. Temporary or permanent bonds can be achieved by spraying one or both surfaces. For permanent bonds or porous surfaces, it is recommended that both surfaces be sprayed with two lighter coats. Blue Foam Bond performs like 3M Blue 72, but at a fraction of the cost. Unlike 3M Blue 72, Foam Bond is made in the USA. Blue Foam Bond is packaged in a self selling counter top display carton. Coverage for most applications is 100 to 125 sq. ft. per can.

(Note: Do not use where a vinyl liner may come in direct contact with the adhesive, or bleed through may occur. Heavy application may delay flashing off of solvents and delay bonding time.)

VOC Compliant for all states.

FEATURES:

- No CFC's
- Fast Tack
- Blue Color
- Pressure Sensitive
- High Volume Spray
- No Methylene Chloride
- Economical Alternative to 3M Blue 72
- Designed for Use With All Wall Foams

STOCK NUMBER	DESCRIPTION	SHIPPING WEIGHT
FB 24	Case of 12 - 24 fl. oz. (Net Wt. 17 oz.) Cans	18 lbs.

Orange Foam Bond™

Gladon Orange Foam Bond spray adhesive was specifically designed for use by the pool professional to bond polyethylene wall foam to a wide variety of surfaces including metal, wood, concrete, and more. Orange Foam Bond adhesive is tinted orange to allow the user to easily see where it has been applied. Gladon Orange Foam Bond is preferred by pool professionals because of its fast tack, high-volume lace spray pattern, low soak-in, and high bond strength. Spray Orange Foam Bond on both surfaces to achieve a permanent bond in as little as 15 minutes. For longer working times and a repositionable adhesive, chose Gladon Blue Foam Bond. Unlike 3M Orange 74, Gladon Orange Foam Bond is made in the USA and it's packaged in an attractive countertop display carton. Coverage for most applications is 200 to 250 sq. ft. per can.

(Note: Do not use where a vinyl liner may come in direct contact with the adhesive, or bleed through may occur. Heavy application may delay flashing off of solvents and delay bonding time.)

VOC Compliant For All States

Duct Tapes

Gladon offers several varieties of **Industrial Grade Duct Tapes** that provide excellent adhesion to a wide variety of surfaces including metal. These tapes have unlimited uses for the pool and plumbing industries.*

DT357 is a Premium quality 13 mil thick 3 inch wide polyethylene coated cloth tape. It has superior tensile strength. It is a clean release tape that resists delamination. It tears straight, hangs straight, and is curl resistant. This tape delivers outstanding performance over a wide range of temperatures and is preferred by professional contractors who demand a consistent, trouble-free product.

DT260 is a high quality 11 mil thick 2 inch wide polyethylene coated cloth tape. It conforms well to irregular surfaces, tears straight, hangs straight, is easy to unwind and is curl resistant.

Looking for another grade of tape? We have over 100 different types available. Call us for pricing and availability of the specific duct tape you prefer.

FEATURES:

- Excellent Adhesion
- Good Tensile Strength
- Does Not Curl
- Water Resistant
- Heavy Duty

STOCK NUMBER	DESCRIPTION	SHIPPING WEIGHT
DT357	Case of 16 - 3" x 60 yds. Rolls	58 lbs.
DT260	Case of 24 - 2" x 60 yds. Rolls	45 lbs.

*Note: Any duct tape may react with plasticizers causing discoloration.

Polyken 223 Duct Tape

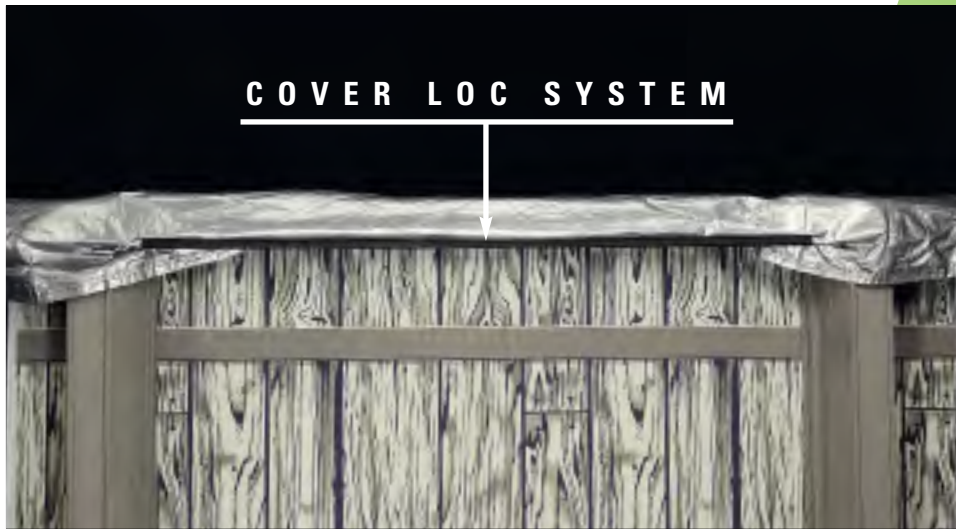

Polyken 223 is multi-purpose cloth-reinforced duct tape. This duct tape is a good choice for pool liner installation. Polyken 223 is also used to tape the joints between pool wall panels and for other pool related applications. This is a polyethylene coated cloth tape with a

natural rubber adhesive. The tape is 10 mils thick and has good adhesion, tack and tensile strength. Polyken 223 is conformable and will not twist or curl during application. This tape is silver in color. A roll is 2" wide and 60 yards long.

FEATURES:

- Multi-Purpose Duct Tape
- Polyethylene Coated Cloth Backing
- Natural Rubber Based Adhesive
- Temperature Range: 40° to 200°
- Recommended For Pool Liner Installations
- No Methylene Chloride
- Will Not Twist or Curl During Application
- 10 Mils Thick
- Silver Color

STOCK NUMBER	DESCRIPTION	SHIPPING WEIGHT
DT 223	Case of 24 - 2" X 60 yd. Rolls	40 lbs.

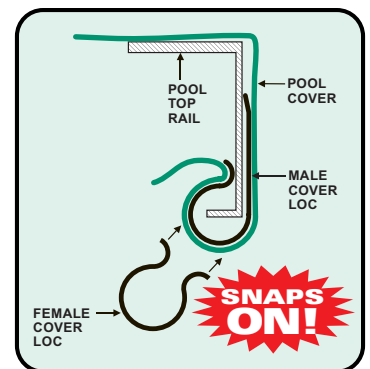

Cover Loc System™

Finally, there is a better way to secure pool covers. Gladon's unique two piece **Cover Loc System** design is engineered to form a positive interlock between a pool's top rails and cover. The Cover Loc System eliminates the need for cables, draw strings, plastic bottles, and weights. During periods of high winds, the Cover Loc System restricts wind lift and pool cover movement along each top rail. Unlike cables, draw strings, plastic bottles, and weights, the Gladon Cover Loc System is an effective way to prolong the life of any cover and reduce top rail paint abrasion.

Engineered and manufactured to last for years, the Gladon Cover Loc System consists of interlocking male and female Cover Loc strips made with a special UV

stabilized resin. The male Cover Loc strip snaps onto each top rail, while the female Cover Loc strip snaps over the cover and onto the male strip. Each male and female Cover Loc strip is 42 inches long and provides over 84 square inches of gripping surface.

Installing the Gladon Cover Loc System is simple. First, a male cover loc strip is clipped onto each top rail. Next, the cover is placed over the pool allowing it to hang over the top rails and male Cover Loc strips. Finally, a female Cover Loc strip is snapped over the cover and onto each male Cover Loc strip. Removal is quick and simple, just pull on the excess cover material and the female Cover Loc strips are released. Male Cover Loc strips may remain on the pool year round, if this is desired.

Installation Diagram

FEATURES:

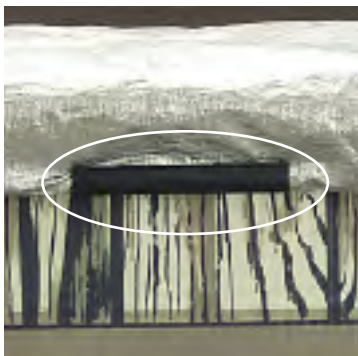

- Secures Pool Covers
- Extends Pool Cover Life
- Eliminates Unsightly Plastic Bottles
- Restricts Wind Lift
- Reduces Top Rail Abrasion
- Replaces Cables and Weights

GCLS 4275	Carton of 75 sets (1 male & 1 female piece/set)	55 lbs.

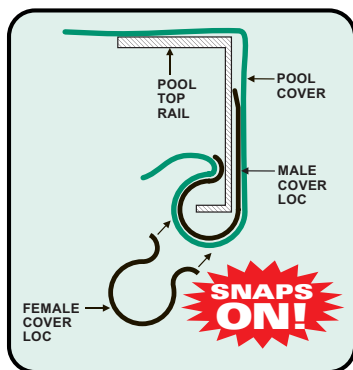

Cover Loc JR™

Cover Loc JR Detail

Installation Diagram

Gladon Cover Loc JR's are a smaller version of the unique, highly effective Gladon Cover Loc System™. Made of 5 inch long sections, instead of 42 inch sections, Cover Loc JR's are an economical alternative to other less effective one piece designs. However, Cover Loc JR's do not offer as much wind blocking and holding power as the full length Cover Loc System.

Cover Loc JR's are designed to last for years and consist of interlocking 5 inch long male and female parts made with a flexible, UV stabilized resin. Male Cover Loc JR's snap onto a pool's top rail and female Cover Loc JR's snap over the cover onto the male parts. This two-piece design offers more holding power than any other cover clip.

Installation is a snap! Just install a minimum of three male Cover Loc JR's per top rail. Next, place the cover over the pool and top rails. Finally, snap the female Cover Loc JR's over the cover on to the male pieces. Just pull on the excess cover material to remove the female Cover Locs. Available in colorful hanging display bags with UPC code.

FEATURES:

- Eliminates Unightly Plastic Bottles
- Economical
- Superior to One Piece Clips
- Secures Pool Covers
- Extends Pool Cover Life
- Restricts Wind Lift
- Reduces Top Rail Abrasion

CLJR5012B	Carton of 50 Bags Containing 12 Cover Loc JR's	46 lbs.

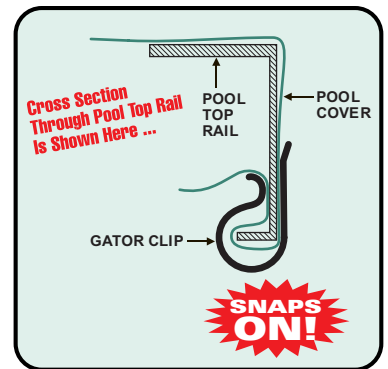

Gator Clip™

Gladon's **Gator Clip** is an economical one-piece clip that secures winter pool covers. Designed for use on most above ground swimming pools that have metal top rails, the Gator Clip snaps on over the cover and grips "Like The Jaws of a Gator".

Gator Clips are made from a special resin that resists cracking in cold weather.

Gator Clips come packaged in a carton that contains 500 bulk clips and two attractive countertop display boxes. A 1,000 bulk clip refill carton is also available.

(Note: The Gator Clip is not recommended for use in high wind areas or in other applications where maximum holding power for the pool cover is needed. Although the Gator Clip is the best one-piece cover clip made, the holding power of a one-piece clip can NOT approach that of our two-piece design. For the highest level of performance, use our two-piece Cover Loc System™.)

**The One
With The
Handles!**

Winter Cover Wrap™

Gladon Winter Cover Wrap™ is a specially formulated blue stretch film that is designed to wrap tightly around the top of an above ground pool to help secure the winter cover and protect it from wind damage. In addition to helping secure the cover, the cover wrap seals the pool to keep out dirt and help keep it clean. Gladon Winter Cover Wrap™ works great in conjunction with our other winterizing products — Cover Locs™ and Gator Clips™.

Made from a special blend of UV stabilized resins, the stretch film holds tight even in extreme cold temperatures and resists degradation from sunlight. The film holds tight, but is easy to remove in the spring. It sticks to itself, not to your pool and cover. The film is wound on a unique core that has EZ Grip™ handles. The handles make wrapping your pool easy. The generous 500 foot X 15 inch roll permits multiple-layer wrapping that creates a really tight seal.

Each roll of Winter Cover Wrap™ is packaged in an attractive full color display box. This box is designed so that it can be shipped or mailed without additional packaging. This product is sold as a case of 12 individually boxed rolls of wrap.

A free standing, point of purchase display unit is available to help boost sales. The display unit holds 12 boxes of wrap.

Floating Spa CoverSaver™

Gladon's Spa CoverSaver is designed to float on the surface of the water in your spa. The CoverSaver protects your expensive spa cover from the chemicals in your spa water, extending cover life. At the same time it reduces water evaporation and the loss of spa chemicals. The CoverSaver works with your main cover to limit heat loss, saving expensive energy.

The CoverSaver is made from a closed cell insulating foam, bonded to an impervious

layer of an advanced polymer material. This unique composition resists the absorption of moisture and chemicals. It also allows water to sheet off during removal. This eliminates the dripping and mess associated with bubble type covers.

Compared to "bubble wrap" material, CoverSaver lasts longer and insulates better.

The Spa CoverSaver can easily be trimmed to fit any spa shape.

FEATURES:

- Extends Spa Cover Life
- Saves Energy
- Saves Chemicals
- Does Not Absorb Moisture
- Light Weight
- Trims Easily to Fit Any Spa Shape
- Seamless One Piece Design
- Rolls Up For Easy Storage

Water Noodles

The Water Noodle is a flexible water toy and exercise float that has unlimited uses. People of all ages will have fun just noodling around with it. Water Noodles can be used for floating, splashing, making waves, exercising, or riding like a seahorse. Uses for noodles and accessories are limited only by one's imagination.

Made of buoyant, lightweight, closed cell polyethylene foam, Water Noodles are highly resistant to water absorption and harsh pool chemicals. Excellent tear, tensile, and resiliency mean Water Noodles can take lots of bending, twisting and rough-tough abuse.

Water Noodles have evolved into a wide product line that includes big boss, connectors, rafts, chairs, bobbers, and more. Water Noodles come in a wide variety of shapes and sizes. Water Noodles and accessories are available in attractive display cartons with individually UPC coded contents.

NOTE: The Water Noodle is not a safety device. Water Noodles and accessories are intended for ages 5 and up. Children should not be left unattended around the pool or water. The Water Noodle should be stored out of direct sunlight to prolong its life. Colors and shapes may vary from those shown.

FEATURES:

- Unbreakable
- Unlimited Uses
- Fun for Ages 5+
- CFC and HCFC Free
- Great Impulse Item
- Water Exercise Float

KneeSaver™

Gladon's KneeSaver is a premium grade kneeboard designed for and tested by professionals. This is NOT another cheap, flimsy knee pad. The quality and comfort of this product will be appreciated by all craftspeople who spend significant time kneeling while they work.

The KneeSaver is made from a special high density, soft foam. This foam provides superior support and comfort while providing the durability needed for demanding everyday usage.

This Personal Protection Equipment (PPE) provides exceptional comfort for the Professional Craftsman.

The KneeSaver has recessed handles that facilitate easy movement throughout the workspace. It has rounded edges that protect the work surface. The durable surface is washable. The KneeSaver is a generous 15" x 24" size and is a full two inches thick for maximum comfort.

The KneeSaver is packaged for sale in pairs.

This quality product is made in the USA.

Scrub without the rub! Mytee Mitt™

Would you clean your car with a regular pool brush? Well, you can with **Mytee Mitt™**. With its full coverage, Mytee Mitt cleans better, protects your hand and rinses clean.

Use Mytee Mitt with cleansers or by itself to remove algae, rust, and dirt easily from tiles, fiberglass, cement, and vinyl with less work, in less time. Patented non-scratch cleaning bristles do the work. Use on skimmers, acrylic spas, coping and scum lines.

A **Mytee Brush™** version is available that fits on standard poles. Replacing brushes with inferior bristle types, Mytee Brush swivels in all directions and adapts to fit two kinds of standard pool poles.

Mytee Foot™ slips onto your foot for easy, convenient cleaning of pool and spa bottoms, floors, etc. Great for showers, too! Simply clean the bottom while showering, then hang Mytee Foot to dry.

Bulk refills are available for the Mytee Mitt, Mytee Foot and Mytee Brush.
