

NITROGEN TIRE INFLATION PRODUCT GUIDE 10

Whether you run a motorcycle shop or a large trucking fleet, Branick has a nitrogen system that's right for you. Branick's green family of nitrogen systems are built with Air Products PRISM® Membrane technology. The PRISM® Membrane removes oxygen, moisture and other contaminants. Our exclusive Air Products membranes are the most efficient available, requiring less compressor time and reducing operating costs. It also makes our systems the fastest on the market.

Nitrogen is a dry, inert gas. Maintaining the proper nitrogen purity in your tire and removing oxygen from the tire means less damage to the inner liners, steel belts and rims due to oxidation and condensation. Nitrogen, due to its larger molecular size, is also slower to migrate out of a tire than oxygen which means the tire stays properly inflated longer. The benefits of holding proper tire pressure longer with nitrogen include fewer TPMS warnings, extended tire life, lower fuel costs and a more reliable tire which maximizes vehicle handling and reduces blowout potential.

We proudly use Air Products PRISM® Membranes.

Branick's nitrogen generators are the fastest and most efficient and the PRISM® membranes require less feed air than all other nitrogen systems.

- 5 year membrane warranty
- 5 years of free filter elements
- 95% purity guaranteed for passenger tires
- 97% purity for truck tires
- Working pressures up to 200 psi
- Simple twist of a dial for higher purity and output of nitrogen
- Our properly sized systems ensure ready and "on-demand" fills; no waiting on an undersized system
- Long term reliability and ease of operation make our generators the industry choice

Reduce TPMS Warnings!
