PNEUMATIC BEAD EXPANDERS

Expansores neumáticos de llantas
Tubes d'extension de talon pneumatiques

Expanders fit most bias ply tubeless tires. A pliable neoprene rubber tube is encased in a tough, long-lasting nylon cover. Expanders slip easily over tire and withstand contact with oil, grease, solvents, and acids. Expands passenger and light truck beads by compressing tread. **T131** is for smaller tires, **T132** for belted bias ply tires and steel belted radials, and **T133** for standard bias ply tires. All models feature an over-pressure relief valve and external pressure quick release valve for safe operation.

TIRE BEAD SEATERS

Calzador para llantas
Cordons de talon de pneus

One-piece rubber tube for mounting hard-to-seat radial, bias-belted, or conventional truck tires. As tire is inflated, the lubricated bead seater forms a seal between the rim and tire, allowing the air pressure to force the beads into the rim flange. As proper pressure is reached, the bead seater slides out and over the rim. Use bead lubricant with bead seaters.
