

Upright pole shall be constructed of 3 1/2" OD, 8 ga. galvanized structural tube suitable for 36" ground bury. Two 3 1/2" OD, 3 ga. extension arms shall clamp to and extend from the upright pole approximately 36" and be designed so that the selected backboard and rim (ordered separately) is mounted directly to the extension arm for maximum support. Extension arms shall have a hot dipped galvanized finish. Pole shall include four 1 5/8", 13 ga. galvanized tubular braces to support the upper corner of each backboard for stability. Poles without backboard support braces and a direct mount feature shall not be considered equal. Pole shall carry a limited lifetime warranty and weigh approximately 125#. Installation shall be completed in accordance with manufacturer's instructions.
