

Upright pole shall be constructed of 4 1/2" OD galvanized structural tube suitable for 48" ground bury. Two 4 1/2" OD galvanized extension arms shall clamp to the upright pole, extend from the upright pole 48" and be designed so that the selected backboard and rim (ordered separately) are mounted directly to the extension arm for maximum support. Extension arms shall have a hot dipped galvanized finish. Pole shall include four 1 5/8", 13 ga. galvanized tubular braces to support the upper corner of each backboard for stability. Poles without backboard support braces and a direct mount rim feature shall not be considered equal. Pole shall carry a limited 25 year warranty and weigh approximately 240#. Installation shall be completed in accordance with manufacturer's instructions.
