E	4	Hand Knob			
F	4	Wing Nut			
G	4	5/8" X 3" Carriage Bolt			

- ◆ Inspect all contents prior to installation. Report any missing parts to dealer immediately.
 - ◆ Read all instructions before proceeding.
1. Install *Lever Bracket (C)* and *Safety Channel (D)* onto the back stay with the *1.66" Round Clamp Assembly (P)*. This wheel assembly works the best when you install as close to the vertical uprights as possible. Make sure the vertical leg of the *Lever Bracket (C)* is positioned to the outside of the goal and level. See illustration on page #2.
 2. Attach *Wheel (A)* to *Wheel Lever (B)* in the larger of the two square holes with the *5/8" X 3" Carriage Bolt (G)* and *5/8" Lock Nut (I)*. One side of the *Wheel (A)* has a hub that allows clearance for the *Wheel Lever (B)* and you want the *Lock Nut (I)* on the outside of the wheel. Keep in mind that you will need a right and left assembly, it is best to lay all of the parts out next to each upright, orient prior to assembly. Once you have both wheels assembled onto the wheel levers you can now attach the wheel lever to the *Lever Bracket (C)* with the *1/2" X 1" Carriage Bolt (H)* and the *1/2" Lock Nut (O)*. Make sure the Carriage Bolt is firmly seated in the square hole on the Lever. Tighten 1/2" hardware and back off 1/2 turn until the *Wheel Lever (B)* can rotate freely. See illustration on page #2
 3. Use the *Hand Knob (E)* and *Wing Nut (F)* to lock *Wheel (A)* in position for transport. Once goal is positioned for play remove *Hand Knob (E)* and *Wing Nut (F)*. Rotate Wheel up and back until resting on the playing surface away from the front of the goal. Replace *Hand Knob (E)* and *Wing Nut (F)* into the *Wheel Lever (B)* for storage. See illustration on page #2.
