

Sleeves are constructed of extruded aluminum tubing with an approximate inside diameter of 3" and outside diameter of 3 1/2 ". Suitable for installing a 3" diameter volleyball post in a 3 1/2" diameter socket. Sleeve length is approximately 8 1/2". Two 1/4" diameter threaded holes allow setscrews (provided) to attach the sleeve to either the 3" pole or to the inside diameter of the 3 1/2" floor socket or can be used without attachment.
