

Sleeves are constructed of extruded aluminum tubing with an approximate inside diameter of 3 1/2" and outside diameter of 4". Suitable for installing a 3 1/2" diameter volleyball post in a 4" diameter socket. The sleeve length is approximate 8 1/2". Three 1/4" diameter threaded holes allow setscrews (provided) to attach the sleeve to either the 3 1/2" pole or to the inside diameter of the 4" floor socket or can be used without attachment.
