## Spin-It-Out™ Broken or Damaged Screw Removers

U.S. Patents #6,978,697, #7,171,871

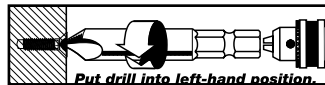

U.S. Patents #6,978,697, #7,171,871, Other Patents Pending, Worldwide Patents

**One-Step**

# Spin-It-Out™

- One Step, No Flipping To Use
- Use With Hand Screwdriver or Drill

The Broken/Damaged Screw Remover is extremely easy to use. Just set the drill to reverse to take out a screw when the Phillips®, Torx®, Robertson®, Posidriv® or Tri-wing® screw is damaged. The product comes in five different sizes: #0, #1, #2, #3, #4. Simply select the correct size for the screw head size and use in low speed in reverse on your drill. Use #0 for #0 Phillips® Screw, #1 for #1, #2 for #2, #3 for #3, #4 for #4 screws. For stubborn screws, use the smallest size first and then graduate to the larger sizes until the screw is removed.

## Tile or Glass Tungsten Carbide Tipped Drill Bits

- (1) While drilling, apply very little pressure.
- (2) Lubricate with turpentine, wax or water.
- (3) For mounted tile or glass use low speed.
- (4) Complete drilling from other side when possible.
