APPLICATION

1. Loosen all closure straps and slip the wrist support onto the hand similar to putting on a glove. The d-rings and closure straps should be facing up, and the palmar stay, located on the bottom of the support, should stop just before the crease of the palm (Fig. A).
2. Starting with the strap furthest from the wrist, feed each closure strap through the corresponding d-ring closure and secure so that a snug fit is achieved (Fig. B).
3. Continue working down the support, securing each closure strap while making sure the wrist support still remains properly aligned. Once each strap has been secured, the straps can be trimmed down if needed for a better fit. Tighten and adjust as needed (Fig. C).
