Lightweight Design

Weighing under 4 oz., the wrist extension splint provides incredible support while remaining lightweight and low-profile, helping patients get back to normal activity quickly.

Easy to Use/ Adjust

The wrist extension splint features a hook strap and D-ring closure system, allowing for easy application and adjustment without requiring tools or further assistance.

Breathable Construction

Made of breathable soft goods, the wrist extension splint promotes airflow to the wrist and hand, speeding up the healing process as well as to help keep patients cool and dry, even after long periods of use.
