Lightweight Design

Weighing under 4 oz., the wrist/ thumb splint provides incredible support while remaining light-weight and low-profile, helping patients get back to normal activity quickly.

Easy to Use/ Adjust

The wrist/ thumb splint features a hook strap and D-ring closure system, allowing for easy application and adjustment without requiring tools or further assistance.

Breathable Construction

Made of breathable soft goods, the wrist/ thumb splint promotes air-flow to the wrist and hand, speeding up the healing process as well as to help keep patients cool and dry, even after long periods of use.
