

# Comfortmax Shoulder/ Arm Abduction System

In response to customer demands, Comfortland introduces the Comfortmax shoulder/arm abduction system; a lightweight, universally-sized alternative to traditional shoulder abductors. Featuring a unique design, the CK-800 includes telescoping arms, eliminating the need to keep several sizes on hand. A durable, removable wedge allows shoulder positioning at 0, 15, 30, 60, and 90 degrees, while the strapping system allows the CK-800 to be worn on the left or right arm with minimal adjustment.

## Indications:

Post-operative rotator cuff, elbow and shoulder injuries

Rotator cuff tear and tendonitis at the shoulder

Adhesive capsulitis at the shoulder (frozen shoulder)

Cumulative trauma/ repetitive strain injury

Elbow fractures including radial head

Stroke and CVA recovery and residual hemiparesis

Product Sku: CK-800
