Easy to Use

The Accord III features a front closure and a unique quick-lace system, allowing patients to get a secure and comfortable fit quickly and easily.

Multiple Levels of Customization

With an optional posterior panel and a heat-moldable footplate, the Accord III enables practitioners to achieve a custom fit by being able to mold this AFO to a specific patient's anatomy.

Increased Performance

Rigid uprights and a functional hinge help wearers get back to their daily routine without fear of further injury, helping to rehabilitate muscles in the ankle and foot as well as to prevent atrophy.
