

Endeavor OA LP Part # ER-300

HCPC L1851 Approved

Indications:

Osteoarthritis

Rheumatoid arthritis

Meniscal cartilage derangement

Chondromalacia of patella

Knee ligamentous disruption

Sprains and strains of the
medial collateral ligament

Lightweight Construction

The OA LP's lightweight design allows for longer periods of wear without discomfort, improving patient compliance.

Powerful Unloading Technology

The ER-300 features powerful lateral struts and a 3-point leverage system to fully unload the medial compartment of the knee, helping to promote normal joint movement and reduce pain.

Easy-to-Adjust

The Comfortland OA LP comes with everything needed for full adjustment, allowing users to customize range-of-motion and valgus/varus adjustment.
