

Comfortland OA Knee Brace

HCPC L1843 Approved

Indications:

Osteoarthritis

Rheumatoid arthritis

Meniscal cartilage derangement

Chondromalacia of patella

Knee ligamentous disruption

Sprains and strains of the
medial collateral ligament

Lightweight Construction

The Comfortland OA's lightweight design allows for longer periods of wear without discomfort, improving patient compliance.

Powerful Unloading Technology

The OA-200 features powerful lateral struts and a 3-point leverage system to fully unload the medial compartment of the knee, helping to promote normal joint movement and reduce pain.

Easy-to-Adjust

The Comfortland OA comes with everything needed for full adjustment, allowing users to customize strap size, range-of-motion, and valgus/varus adjustment. Once the brace is initially fitted, the quick-release snaps on each strap allow for easy application and removal.
