Introducing Clorox EcoClean™

Cleaning and Disinfecting

Clorox EcoClean™ is a new product line that is designed for cleaning professionals who seek more sustainable disinfectants and cleaners to help keep their facilities clean and healthy. Clorox EcoClean™ products use EPA Safer Choice and Design for Environment certified ingredients and are available in 25% post-consumer recycled plastic. We understand that disinfecting and cleaning is essential for every facility, so we made each product to provide effective surface coverage when used as directed. Clorox EcoClean™ product line includes a Disinfecting Cleaner, All Purpose Cleaner and Glass Cleaner.

Third Party Certifications

The below certifications provide confidence that products have been independently reviewed and meet strict standards including, environmental and safety criteria. Safer Choice, Design for the Environment, and USDA biobased are certifications awarded to products that have been voluntarily submitted for full ingredient review.

Safer Choice is an EPA Pollution Prevention (P2) program and cleaning product certification, which includes practices that reduce, eliminate, or prevent pollution at its source, such as using safer ingredients in products. Participation in the Safer Choice program is voluntary. Companies who make products carrying the Safer Choice label have invested heavily in research and reformulation to ensure that their products meet the Safer Choice Standard.

<https://www.epa.gov/p2>
<https://www.epa.gov/saferchoice/standard>

Design for the Environment (DfE): EPA's DfE logo helps consumers and commercial buyers identify antimicrobial products that meet the health and safety standards of the pesticide registration process required by the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as well as other rigorous criteria required by the agency. When a consumer or purchaser sees EPA's DfE logo on a product, they can feel confident that the product meets stringent EPA criteria for efficacy and effects on human health and the environment.

USDA Biobased: The USDA Biobased label assures a consumer that the product contains a verified amount of renewable biological ingredients (referred to as biobased content). Consumers can trust the label to mean what it says because manufacturer's claims concerning the biobased content are third-party certified and strictly monitored by USDA.
