

## Solo® VS SSP Paper Food Containers

### Serve It Up and Go!

A unique offering in our food container line up, Solo® VS SSP paper food containers, are perfect for holding hot foods up to 205°F due to the single-sided polyethylene-coated paper on the inside of the container, which acts as a moisture barrier to prevent leaking. The matte finish on the outside of the container conducts less heat on your fingertips. These versatile containers can also be used for cold foods with immediate consumption. The squat profile and wide mouth makes this product easy for operators to fill and easy for customers to eat!

# Solo® VS SSP Paper Food Containers

## Features

### Purposeful design

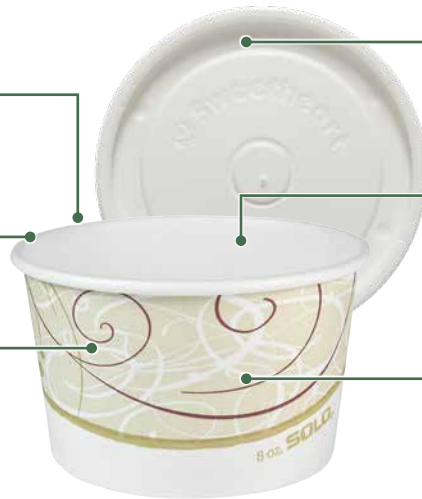

Wide mouth and squat profile make it easier to fill and eat from the container

### Rolled rim

Gives rigidity to the container and ensures secure leak-resistant lid fit

### Dual-temperature usage

Multi-purpose, single-sided polyethylene-coated paper container that can be used for both hot and cold applications with a maximum temperature of 205°F

### Put a lid on it

Multiple plastic lid options available in a variety of materials to cover all customer needs

### Prevents leaking

Single-sided, polyethylene-coated paper on the inside of the container acts as a moisture barrier to keep liquid inside

### Sustainable alternative

Made with at least 90% plant-based renewable resources; we source fibers certified under the SFI® chain of custody
