

BAG MATERIALS

POLYETHYLENE BAGS (LDPE): These are the most common plastic bags. Elkay polyethylene bags are made from virgin materials, so they comply with FDA requirements for use in food applications. A wide selection of sizes and gauges are available to meet virtually any need you might have.

Available in the following bag styles:

- Flat
- Seal Top
- Covers & Tarps
- Utility Bags on Rolls
- Gusseted
- Header Pak®
- Trash Bags
- Drawstring
- Tubing
- Kwik-Fill®
- Mattress Bags

TUF-R® LINEAR LOW DENSITY BAGS (LLDPE): Made from a unique blend of linear low density and low density resins that often allows a thinner gauge bag to provide the same or better strength and puncture resistance as a standard low density bag of a higher gauge. Meet FDA requirements for food use.

Available in the following bag styles:

- Flat
- Gusseted
- Kwik-Fill® Bags on Rolls

POLYPROPYLENE BAGS (PP): Polypropylene bags have long been the premier choice for outstanding product presentation and to preserve freshness. Excellent clarity, vapor and moisture barrier properties. Meet FDA requirements for food use.

Available in the following bag styles:

- Flat
- Gusseted
- Seal Top
- Drawstring

HIGH DENSITY (HDPE): High molecular weight, high density film makes these bags strong and durable. Ideal for shopping bags. Several of these bags are packaged in a low cube dispenser carton that is easy to use at the retail counter and stores easily on shelves. Meet FDA requirements for food use.

Available in the following bag styles:

- Merchandise Bags
- T-Shirt Bags
- Utility Bags on Rolls

STATIC CONTROL BAGS

PINK ANTI-STATIC (PAS): Pink Anti-Static bags are an excellent choice when static control is necessary, but Faraday Cage Protection is NOT required. They effectively eliminate the hazard of static damage to sensitive electronic components during packaging, storage and shipping.

Available in the following bag styles:

- Flat
- Seal Top
- Tubing

STRATOGREY™ Buried metal construction provides double protection against static discharge. Amine/amide-free interior with semi-transparent material allows for protection and easy identification of contents. These bags are not QPL certified.

Available in the following bag styles:

- Flat
- Seal Top

Some things are forever.
Your Take Out Bag doesn't have to be one of them.

d2w® additive is a recyclable, FDA compliant additive that can help reduce the life span of poly bags that are exposed to the open environment.

Put this remarkable technology to work for you today and enjoy a cleaner tomorrow.

* Lifetime depends on environmental factors and may not necessarily be less than a year.
Please dispose of all waste responsibly.
Not for composting.
Do not break down in a landfill.

ELKAY® PLASTICS HAS THE RIGHT PRICED SOLUTIONS TO HELP YOU SELL!

TUF-R® BAGS - LOWER COST without sacrificing PERFORMANCE!

- TUF-R® bags have superior strength that allows a lighter gauge TUF-R® bag to do the job of a heavier gauge LDPE bag.
- TUF-R® bags have superior clarity thanks to their unique resin blend.
- Because TUF-R® bags are bottom sealed and not side sealed like some competitor's bags, they have the strength you need for your most demanding applications.
- TUF-R® bags are made with virgin resin, so they meet FDA requirements for use with food products.

VALUE PLUS SEAL TOP BAGS

You don't have to sacrifice quality for price! Elkay's new 1.4 mil Value Plus zipper bags have the same quality features that you've come to expect from Elkay.

- Value Plus Seal Top bags are an excellent choice for general storage
- Packaged in individually labelled inner dispenser packs
- Fifteen popular sizes available to choose from
- Meet FDA requirements for use in food applications

See page 23 for our complete selection of Value Plus zipper bags.

6.6 BARRIER BAGS

- Protect contents against electrostatic discharge and EMI/RFI radiation
