

# BAG MATERIALS

**POLYETHYLENE BAGS (LDPE):** These are the most common plastic bags. Elkay polyethylene bags are made from virgin materials, so they comply with FDA requirements for use in food applications. A wide selection of sizes and gauges are available to meet virtually any need you might have.

*Available in the following bag styles:*

- Flat
- Seal Top
- Covers & Tarps
- Utility Bags on Rolls
- Gusseted
- Header Pak®
- Trash Bags
- Drawstring
- Tubing
- Kwik-Fill®
- Mattress Bags

**TUF-R® LINEAR LOW DENSITY BAGS (LLDPE):** Made from a unique blend of linear low density and low density resins that often allows a thinner gauge bag to provide the same or better strength and puncture resistance as a standard low density bag of a higher gauge. Meet FDA requirements for food use.

*Available in the following bag styles:*

- Flat
- Gusseted
- Kwik-Fill® Bags on Rolls

**POLYPROPYLENE BAGS (PP):** Polypropylene bags have long been the premier choice for outstanding product presentation and to preserve freshness. Excellent clarity, vapor and moisture barrier properties. Meet FDA requirements for food use.

*Available in the following bag styles:*

- Flat
- Gusseted
- Seal Top
- Drawstring

**HIGH DENSITY (HDPE):** High molecular weight, high density film makes these bags strong and durable. Ideal for shopping bags. Several of these bags are packaged in a low cube dispenser carton that is easy to use at the retail counter and stores easily on shelves. Meet FDA requirements for food use.

*Available in the following bag styles:*

- Merchandise Bags
- T-Shirt Bags
- Utility Bags on Rolls

## STATIC CONTROL BAGS

**PINK ANTI-STATIC (PAS):** Pink Anti-Static bags are an excellent choice when static control is necessary, but Faraday Cage Protection is NOT required. They effectively eliminate the hazard of static damage to sensitive electronic components during packaging, storage and shipping.

*Available in the following bag styles:*

- Flat
- Seal Top
- Tubing

**STRATOGREY™** Buried metal construction provides double protection against static discharge. Amine/amide-free interior with semi-transparent material allows for protection and easy identification of contents. These bags are not QPL certified.

*Available in the following bag styles:*

- Flat
- Seal Top
