Sustainable. Reliable. Affordable.™

GREEN SEAL STANDARDS FOR TOWEL AND TISSUE (GS-1)

These products meet Green Seal™ Standard GS-1 based on chlorine-free processing, energy, water efficiency, and content of 100% recovered material with a minimum of 50% post-consumer material for towels and 25% post-consumer material for bath tissue. GreenSeal.org.

All the products are 100% recycled, meet or exceed EPA guidelines for post-consumer/recycled content, are processed chlorine free, and are manufactured at our facilities in New Jersey and Vermont.

- 100% Recycled (recovered after papermaking)
- Minimum 50% post-consumer content for towels (exceeds EPA minimum guidelines)
- Minimum 25% post-consumer content for bath tissue (exceeds EPA minimum guidelines)
- Product performance is consistently measured under controlled and reproducible lab conditions and products meet requirements in the standard for basis weight, tensile strength, stretch and absorbency
- Hardwound (1-ply) towel contains a minimum of 133 sq. ft. per roll; 58 sq. ft. for 2-ply kitchen towels
- Folded (1-ply) towel contains a minimum of 84 sq feet per package
- 2-ply bath tissue contains a minimum of 41 sq feet per roll; 1-ply bath 83 sq ft. per roll
- The papermaking process, including de-inking and/or bleaching, is processed chlorine-free (PCF) and does not contain any additives or contaminants that are carcinogens, mutagens, or reproductive toxins
- The papermaking process meets the established limits for water disinfection and optical brighteners
- Papermaking additives are readily biodegradable, except for those noted in the standard
- Products do not contain any added chlorophenolic biocides, fragrances, heavy metals, or ozone-depleting compounds
- Products are manufactured by companies that adhere to social responsibility guidelines and provide fair conditions of employment
- Products are manufactured within established annual water and energy use criteria
- Roll towel and bath tissue cores are made from 100% recycled materials
- Outer corrugated cardboard packaging is recyclable and made from at least 30% recovered material
- Packaging made from plastic is recyclable, or source-reduced by 20% or contains 25% recovered material content
- Packaging does not contain heavy metals, including lead, mercury, cadmium, and hexavalent chromium nor phthalates, bisphenol A, and chlorinated packaging material (for plastic packaging) that have intentionally been introduced)
- Printing colorants on packaging do not contain lead, mercury, cadmium, and hexavalent chromium in excess of 100 ppm (above trace levels)
