

## SPECIFICATIONS

These complete backstop cable hardware kits provide all the hardware needed to install a professional looking backstop with your new or existing poles. Choose from the Standard Cable System (pole-to-pole) or the Suspended Cable System (tie-back) which provides more of a unobstructive view. Custom netting is sold separately, poles are not included.

### HARDWARE

Installation hardware includes 1/4" galvanized aircraft cable with a 6,100 lb. breaking strength, 12" eye bolts, 12" turnbuckles, 6" turnbuckles, 1/4" cable clamps and 8 mm carabiner clips.

### NETTING SOLD SEPARATELY

The recommended backstop netting to install with the kit is the #12 Knotted Dyneema. This major league professional backstop netting provides maximum protection with maximum viewing. The Douglas<sup>®</sup> Professional #12 Knotted Dyneema is a 1-3/4" square mesh netting with a 308 lb break strength and offers 94% visibility making it the netting of choice for backstop installations. This twisted knotted, ultra high molecular weight polyethylene (UHMPE) material is treated for maximum UV and weather resistance for the utmost longevity. Netting perimeter is finished with a sewn rope border. Other netting can be substituted.
