

Reflect-Specs™

VISUALLY improving the Safety of Safety Glasses! Be seen at night or in low light conditions with patented Reflect-Specs™.

Indoor/Outdoor with
Silver Reflective Panels

Clear Anti-Fog with
Silver Reflective Panels

Reflect-Specs™

Ideal for night construction, utility workers, mining or airport workers.

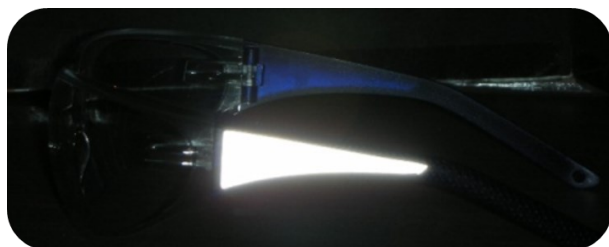

Product Features:

- Patented design integrates reflective temple accents into both outside temples adding another level of visibility and safety for workers in low light and night work applications.
- Economically priced so you can have added safety visibility for all of your workers.
- Super lightweight 0.9 oz./24 gm. with a 10 base polycarbonate lens for tighter wrap and greater protection, comfort, compliance and uninterrupted field of view.
- High visibility yellow rubber tipped temples improve visibility, reduce slipping and enhance comfort.

Other Key Product Features

Just like you see jogger's running shoes reflecting light at night, when retro-reflective panels are moving, they are more likely to be seen. This is the reason why your workers NEED the addition of reflective panels on their safety eyewear.

The head is rarely still. Workers are ALWAYS moving their head during work activities. This motion GREATLY increased the 'flashing' of the retro-reflective panels on the Reflect-Specs™ eyewear increasing the visibility and safety of workers.

- Universal nose bridge for comfort and fit.
- Meets ANSI Z87.1-2010+ high velocity protector.
- Polycarbonate lenses absorbs 99.99% of harmful UV A, B and C, 180-380nm.
