

The Ultimate

# Scale-Stain-Scum Controller

Prevents - Removes - Continuously Cleans Pool Surfaces

Only 1 bottle per year  
per 10,000 gallons (40,000 litres)

Excellent for  
Salt Pools,  
Chlorine Pools  
and  
Non-chlorine pools

## Beautec® Advanced Surface Protection

- Aggressively prevents scale, stain and scum-oil-biofilm buildup.
- The only multi-scale preventative - controls high levels of calcium and hard silicates (the scale acids and scrubbing will not remove).
- Multi-stain preventative (iron, copper and manganese metals).
- Removes oil-scum buildup without need to use enzymes.
- Helps remove existing buildup on surfaces, tile and equipment.
- Salt cell de-scaler (without acids), protector and prolongs cell lifespan.
- Long lasting. Chlorine stable. Phosphate and acid free.

# BEAUTEC

## PRODUCT DATA SHEET

### PRODUCT FUNCTION:

The ultimate pool surface protection for superior scale, stain, and scum control and removal. New Synertec® polymer technology provides unsurpassed surface protection without phosphates and acids. Beautec® also removes existing scale buildup on tile and salt cell generators without scrubbing and use of harsh acid cleaners. Metal stains due to iron, copper, and manganese are strongly sequestered to prevented surface damage. Beautec® Scale-Stain Controller is the only product available today that prevents both softer calcium and harder calcium-silicate scales.

1/2 gallon size

### HOW IT WORKS:

Beautec's® advanced Synertec formulation combines a blend of high performance polymers that utilize a complex mechanism of threshold inhibitors, crystal modification and sequestration to accomplish effective preventative and ongoing removal of all mineral scales, deposits, stains, and scum on pool surfaces. Beautec's® exceptional performance is due, in part, to its extreme chlorine stability.

### FEATURES:

1. Provides superior scale, stain, and scum control *plus prevents hard silicate scales.*
2. Salt cell descaler and cleaner. Keeps cell plates clean and optimizes chlorine output.
3. Removes waterline calcium buildup and keeps tile clean with small monthly dosage.
4. Protects entire pool, tile, and equipment year-round.
5. Effectively removes plaster dust during new or remodeled pool startups.
6. Controls calcium hardness levels up to 1000 ppm and silicate levels up to 300 ppm.

### SELLING POINTS:

1. Provides complete control of all types of metals and scale including hard silicates.
2. Excellent for cleaning and maintaining salt chlorinator cells.
3. Small monthly dosage builds protection with each application.
4. Advanced Synertec® formula is both acid-free and phosphate-free.
5. Great for new pool start up. Quickly removes plaster dust and protects pool for months.
6. Protects all pool equipment: filter, heater, water auto-leveler, salt cell, and solar unit.

### CONSUMER BENEFITS:

1. Only 1 to 2 bottles per year for most pools, after initial startup dosage.
2. Provides easy and affordable ... just add monthly or twice per year.
3. Removes existing buildup without costly tile cleaning and acid washing.
4. Easy to use. Just pour in. Swim immediately after treatment.
