

BEAUTEC® Product Overview:

Beautec® provides superior protection against all damaging minerals, scale buildup, and stains on pool surfaces, tile and equipment without phosphates or harsh acids. Beautec® removes metal stains (due to iron, copper and manganese) and prevents new buildup. Beautec® also effectively helps to remove waterline calcium buildup on tile with minimal scrubbing. Salt cell generators are cleaned from calcium deposits continuously optimizing cell output and prolonging its lifespan. Beautec® advanced multi-polymers protect your pool investment by keeping surfaces clean and looking beautiful year-round at an affordable cost.

Beautec® Makes Salt Chlorinator Cells Maintenance-Free

Advanced Year-Round Protection . . .

- Keeps pools scale-stain free, clean, and looking new.
- Removes white calcium buildup on tile and equipment.
- Prevents calcium fading on all pool surfaces.
- Descales and maintains salt cells without acid cleaning.
- Controls high levels of calcium and hard silicates.
- Superior plaster dust removal for new pool startups.

Powerful Synertec® Concentrated Formulation

BEAUTEC®

Superior Pool Scale-Stain-Scum Preventative and Surface Cleaner

- ✦ Prevents and removes waterline buildup and minerals on all surfaces
- ✦ Salt cell descaler, cleaner and protector
- ✦ Prevents and helps remove all metal stains
- ✦ Long lasting protection keeps pool surfaces clean and looking new

64 FL. OZ. (1/2 U.S. Gallon / 1.89 litres)

Made in U.S.A.

BEAUTEC® TREATMENT CHART:

POOL SIZE (in U.S. gals. and litres)	Initial 6 Month Dosage (all pools)	Follow-Up Treatment Options		NEW or REMODELED POOL STARTUP:
		* High Hardness Pools	Every 6 Months	
5,000 (19,000 l)	16 oz (500 ml)	2.5 oz (75 ml)	16 oz (500 ml)	16 oz (500 ml)
10,000 (38,000 l)	32 oz (1 ltr)	5 oz (150 ml)	32 oz (1 ltr)	32 oz (1 ltr)
15,000 (56,000 l)	48 oz (1½ ltrs)	7.5 oz (225 ml)	48 oz (1½ ltrs)	48 oz (1½ ltrs)
20,000 (75,000 l)	64 oz (2 ltrs)	10 oz (300 ml)	64 oz (2 ltrs)	64 oz (2 ltrs)

* Add monthly follow-up dosages OR double initial dosage for stronger protection.

DIRECTIONS FOR USE:

EXISTING POOLS: Add Beautec® directly to pool water according to the "Initial Dosage" chart for your pool size. After initial dosage, follow "Treatment Options" to obtain continuous year-round scale-stain-scum protection. To remove scale buildup on tile, raise water level slightly above waterline scale. Maintain water level for 2 to 3 weeks to allow cleaners to dissolve calcium.

SALT POOLS: Add Beautec® directly to pool water according to the "Initial Dosage" chart for your pool size. It is recommended for salt pools to double the initial dosage in high hardness areas. This provides extra cleaning (or descaling) action of the salt cell. After initial treatment, follow "Treatment Options" for continuous year-round scale-stain-scum and salt cell protection.

NEW OR REMODELED POOL STARTUP: Add Beautec® directly to pool water according to the "New or Remodeled Pool Startup" chart for your pool size. Add product to pool as soon as filling is completed to begin removing plaster dust formation, prevent metal staining, mottling, and scaling.

Beautec® can be used in any type of pool and will not change water chemistries, pH balance and is compatible with all types of pool chemical additives including mineral sanitizer systems. Swimmers may use pool immediately after treatment.

PRECAUTIONARY STATEMENTS:

CAUTION: May be harmful if swallowed as a concentrate. Avoid prolonged direct contact with concentrate in skin, eyes and clothing.

FIRST AID: EYES: Immediately wash with cool water until thoroughly rinsed. **SKIN:** Rinse with water to remove all residue.

Seek medical attention if necessary. **IF SWALLOWED:** Drink two glasses of water and contact a physician for guidance.

STORAGE & HANDLING: Keep container closed when not in use. Spills may be slippery. Mop up product with clean water. Do not blend directly with other pool chemicals.

DISPOSAL: Rinse container. Dispose in trash or recycle.
