### SECTION 6: ACCIDENTAL RELEASE MEASURES

---

**PERSONAL PRECAUTIONS:** For personal protection see section 8. Persons not wearing appropriate protective gear should be excluded from area of spill until clean-up has been completed. If area is not well ventilated, add ventilation for safe occupation of the area while clean-up is conducted.

**ENVIRONMENTAL PRECAUTIONS:** Prevent spreading concentrate solution over a wide area (e.g. by containment or oil barriers). Do not let product enter drains. Do not flush into surface water or sanitary sewer system. Spilled material must be collected and properly disposed of. Never return spill material to its original container. Clean contaminated surfaces with plenty of water. Wash clothing and equipment after handling.

**METHODS FOR CLEAN-UP:** Do Not use compressed air to clear fiber from surfaces. Dust deposits should not be allowed to accumulate on surfaces, as they may form an explosive mixture if they are released into the atmosphere in sufficient concentration.

**SECTION 6 NOTES:** Avoid open flames. Comply with all applicable federal, state, and local regulations for clean-up and disposal methods.

---

### SECTION 7: HANDLING AND STORAGE

---

**HANDLING:** Do not get this material in contact with eyes. Avoid contact with eyes, skin, and clothing. Do not ingest. When using do not eat, drink, smoke or use smokeless tobacco. Provide adequate ventilation. Wear appropriate protective equipment. Wash hands thoroughly after handling. Avoid release to the environment. Observe good industrial hygiene practices.

**STORAGE:** Dry powders can build static electricity charges when subject to the friction of transfer and mixing operation. Provide adequate precautions, such as electrical grounding and bonding or inert atmospheres. Store in a cool, dry, ventilated area. Keep from freezing or away from open flames/heat. Keep out of direct sunlight. Meet all state and local legal requirements.

**OTHER PRECAUTIONS:** Containers of this material may be hazardous when emptied. Since emptied containers retain product residues all hazard precautions given in the data sheet must be observed.

**SECTION 7 NOTES:** NA

---

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

---

**GENERAL ADVICE:** These recommendations provide general guidance for handling this product. Personal protective equipment should be selected for individual applications and should consider factors which affect exposure potential, such as handling practices, chemical concentrations and ventilation. It is ultimately the responsibility of the employer to follow regulatory guidelines established by local authorities.

**VENTILATION:** Always use this material in a well ventilated area to reduce the risk of explosion due to airborne fiber concentrations. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels to an acceptable level. Eye wash facilities and emergency shower must be available when handling this product. A risk assessment should be conducted to determine the appropriate PPE.

**RESPIRATORY PROTECTION:** A NIOSH-approved air-purifying respirator with an appropriate cartridge and/or filter may be permissible under certain circumstances where airborne concentrations where airborne concentrations are expected to exceed exposure limits (if applicable) or if overexposure has otherwise been determined. Protection provided by air-purifying respirators is limited. Use a positive pressure, air-supplied respirator if there is any potential for uncontrolled release, exposure levels are not known or any other circumstances where an air-purifying respirator may not provide adequate protection.

**EYE PROTECTION:** Wear chemical splash goggles or face shield when there is potential for exposure of the eyes or face to liquid, vapor or mist. Maintain eye wash station in immediate work area.

**SKIN & BODY PROTECTION:** Wear appropriate chemical impervious clothing, gloves and boots whenever there is potential for skin contact with product (PVC or Rubber). Launder clothing before reuse. Maintain safety shower at all locations where skin contact is imminent. Contact your local safety equipment supplier to assist the facility in determining proper selection of personal protective equipment for the applications/operations present at your facility. Wear resistant gloves (consult your safety equipment supplier). Discard gloves that show tears, pinholes, or signs of wear.

**OTHER PROTECTIVE CLOTHING OR EQUIPMENT:** Aprons are to be worn if material is likely to deposit on clothing.
