

GUARDIAN™ Silicone Lens Gasket

Guardian™ Silicone Lens Gasket

J&J Electronics® Guardian™ 100% silicone pool and spa lens gaskets provide superior resistance to breakdown from chlorine, heat, and sunlight for a longer-lasting seal than rubber-based gaskets. Guardian is the number one choice for customers looking to install the best quality gasket possible at a price level comparable to other manufacturers' rubber-based gaskets.

Guardian gaskets should always be used when installing long-lasting LED's such as J&J Electronics ColorSplash® and PureWhite-Pro LED replacement lamps, and they work just as well on standard incandescent replacement lamps.

Guardian™ Advantages:

- Designed to last the life of an LED lamp
- 3 year warranty
- Superior chemical and weather resistance
- Available to fit J&J, Pentair®, SwimQuip™ and Hayward® housings

Compatibility	Item #	Fits Housing Model
	LPL-G-P	Pentair® Amerlite™, 784 Series
