Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

- Eye/face protection** Safety glasses or goggles.
- Skin protection**
 - Hand protection** Rubber gloves. Confirm with a reputable supplier first.
 - Other** Wear suitable protective clothing.
- Respiratory protection** Not normally required if good ventilation is maintained and exposure guidelines are not exceeded.
- Thermal hazards** Not applicable.

General hygiene considerations Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
