

# STANDOFFS MOUNTING KIT

Everything you need to mount signage, artwork, posters or awards.

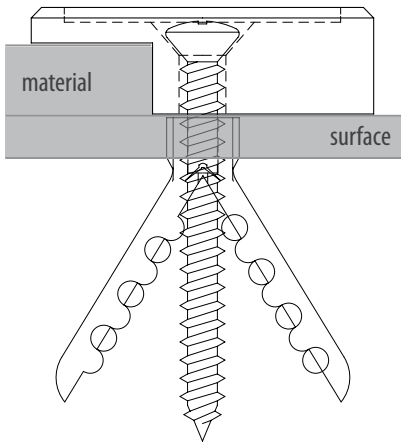

## Panel Mount Kit Installation Instructions

Here's what you'll find in your kit:

*NOTE: Your kit includes two vinyl shims to accommodate different material thicknesses. See table below for how many shims to use.*

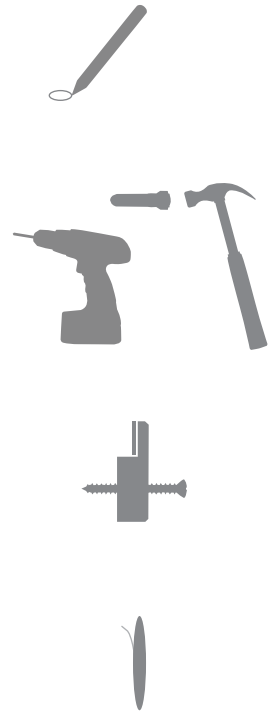

Watch our how-to videos: [standoffsystems.com/howto](http://standoffsystems.com/howto)

| Material Thickness | Vinyl Shims |
|--------------------|-------------|
| 1/8" thick         | 2           |
| 3/16" thick        | 1           |
| 1/4" thick         | 0           |

- 1 Mark the wall 3/16" above and below your desired location of the panel edges.
- 2 Pre-drill 1/4" holes in your surface, then insert **nylon anchors** into the holes and tap them flush.
- 3 Drive **oval head screws** into anchor to mount lower **clips**. Slide in panel and install upper clips.
- 4 Remove the adhesive backing from **discs** and place one into the recess on the face of each clip.

**TIP:** Panel clips should be installed at the top and bottom and at least 2–3" in from the sides of glass mirrors (plastic materials not critical).
