

Hinge and mounting plate selection guide for inset doors**Face frame cabinets****BAR mounting plate****Standard inset hinge****Silentia inset hinge****Titanium inset hinge ***

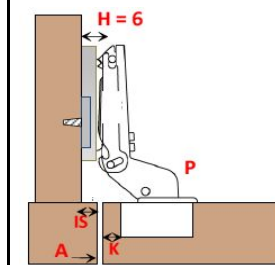

The BAR thick mounting plate system has been developed to offer the appropriate mounting plate thickness for inset doors with face frame cabinets. This eliminates the need to "build up" to match the face frame interspace (IS) dimension.

Select an Inset style (P crank) hinge and the matching mounting plate thickness for your cabinet design

* Please check availability of certain BAR mounting plates in the Titanium finish in your planning phase.

Please refer to a Salice catalog for the correct hinge part number. The hinge part number will be determined by your choice of fixing types, closing style and color.
