

Wall Bed System

Wall Bed System XSMVO

Convenient space saving system.

- Enclosed counter balance for safety - no exposed springs
- Easy screw-type tension adjustment
- Available in 3 load ratings 110, 165 lbs and 240 lbs (weight is the total of frame, hardware, mattress and bedding combined)
 - 110 lb for Twin/Single mattress
 - 165 & 240 for Double/Queen mattress
- Available in 2 hardware mounting styles
 - Exposed - hardware outside mattress box
 - Concealed - hardware inside mattress box
- Build your own bed frame
- Supplied with 2 legs that require a wooden cross bar to be cut and installed by the fabricator
- The wall cabinet must be plumb and securely attached to a suitable wall
- Fully mounted inside the cabinet, not bolted to the floor
- Minimum cabinet depth 14"
- Detailed instructions included

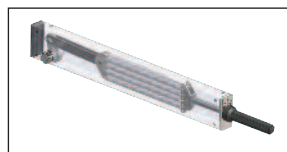

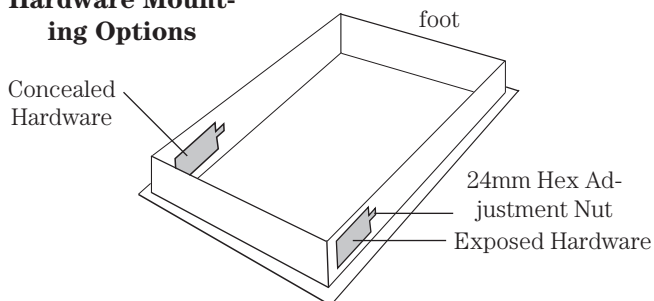

Exposed: Will support common foundations or "inner springs" and requires less assembly time but the hardware is visible when the bed is deployed.

Concealed: More aesthetically pleasing than the exposed unit but access to adjustment is more difficult and it also can require a custom platform for mattress support.

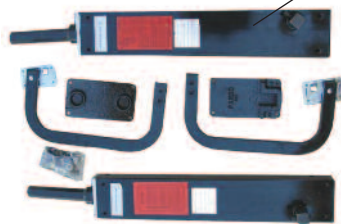

You build the mattress box and cabinetry - we supply the hardware!

Hardware Mounting Options

Cut away to show concealed spring mechanism.
