Multiple Drawer - Side Mount

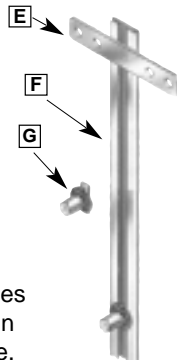

System 150

These (above) single pedestal 3 drawer plus gang locks use the same cabinet mechanism to lock the drawers. The keying mechanism itself varies to accommodate sidemount or front mount (at right)

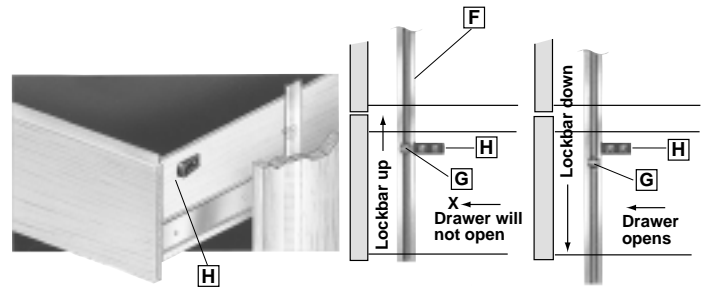

- E** TLLR-100 lockbar retainer holds the lockbar in its groove when drawer slides alone are not sufficient.
- F** TLLB 24" or 48" lock bar can move up or down 1/2" in dado allowing or preventing drawer movement.
- G** TLAP-037 3/8" adjustable pins are easily installed or moved to any position along the length of the lockbar.

TLDC-500 Drawer locking clips provides a strong, rigid lock that fits easily within the standard 1/2" drawer slide clearance.

TLDC-500 drawer locking clips provide the preferred method of locking drawers. When used with the AP-037 3/8" adjustable pin, a strong, rigid lock is provided that fits easily within the standard 1/2" drawer slide clearance.

- E** TLLR 100 Lock bar retainer (1 per pedestal)
