# PRODUCT DATA SHEET

Product Description: Ceiling fan wall control switch, UL listed. Fabricated from plastic with white finish. Hardwired to existing electrical supply. Single ON and OFF function for light and three speed controls for fan. This control switch requires 4 wires: (1) a green or an uninsulated bare copper ground wire; (2) a black power supply wire; (3) another black wire to fan motor; (4) a red wire to light. If you have all 4 wires, this control switch is appropriate. If you only have 3 wires, this product is not appropriate. If you are replacing an old ceiling fan which has 2 separate switches to control ceiling fan speed and light brightness, this is the correct product. Installation by licensed electrician is recommended. For your safety, we recommend a licensed electrician to install the ceiling fan wall control switch.

1 3/4" [44.3mm]

3 13/16" [96.6mm]

3 5/16" [83.7mm]

1 7/16" [36.2mm]

4 3/16" [106.1mm]
