

LA-261 Lavalier Microphone

The LA-261 Lavalier Microphone is a high performance, non-directional microphone that clips on your collar or lapel.

The LA-261 has an omni-directional pickup pattern. This means that audio from a broader area can be picked up by the microphone element. The main advantage of this type of microphone is that it does not have to be oriented directly towards your mouth for good audio pickup.

Using the LA-261 Lavalier Microphone

- Set the microphone sensitivity switch (located inside front cover of the LT-700 Portable FM Display Transmitter) to the MED position.
- Clip the microphone as close as possible to your mouth. For best results the mic element should be no more than 6 inches from your mouth. This will help to ensure that the microphone picks up your voice rather than room noise.
- Make sure the microphone is not rubbing on your face or clothing.
- Connect the plug firmly to the microphone connector on the LT-700.
