LISTEN TECHNOLOGIES

Listen EVERYWHERE
Wi-Fi Audio Receiver 1020

Quick Start Guide

This device is an assistive listening receiver intended to be used with a Listen EVERYWHERE system to stream audio across a wireless local area network. The device is locked down and configured for use as a Wi-Fi audio receiver. No other device services or applications are accessible.

Get to Know the Receiver
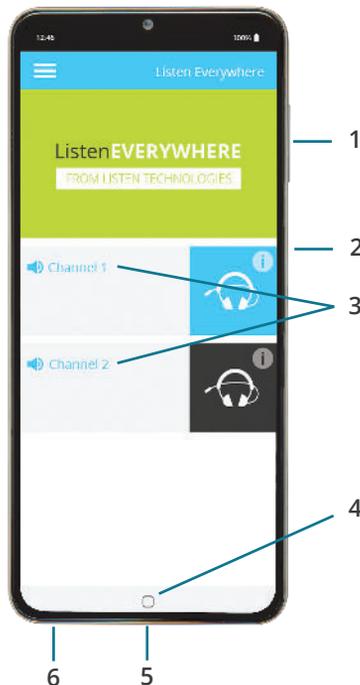

1. **Volume Controls**
2. **Power**
3. **Audio Channels**
4. **Home**
5. **Charging Port (USB-C)**
6. **Headphone Jack (3.5 mm)**

Getting Started

1. Remove the device from the protective packaging.

2. Put the receiver in the protective case. The LA-511 protective case is optional (and highly recommended) and sold separately.

3. Fully charge the device using the included USB-C charging cable. The device will indicate the charging status on the screen and indicate when the battery is fully charged.

   Please note: this device includes the USB-C charging cable, but the LA-424 charging block is sold seperately.

4. Power on/off the device by pressing and holding the power button.

Connection Settings

From the home screen, tap the settings icon to access the following options:

Wi-Fi – Select your Wi-Fi network and enter the password as required. The selected Wi-Fi network must be the same network

the Listen EVERYWHERE server uses to broadcast channels.

Bluetooth® – Pair wireless headphones, earbuds, speakers, or hearing aids to the receiver to stream wirelessly.

To exit the settings menu, tap the home button.

Using the Receiver

To use the receiver for the first time, connect to the Wi-Fi network streaming the audio. The receiver must be connected to the same Wi-Fi network as the server before the receiver can discover and play audio channels (see above for the Connection Settings).

1. From the home screen, tap on the Listen EVERYWHERE app icon. The app will open and then scan and display the available channels from the network.

2. Select an audio channel from the list, adjust the volume to a comfortable listening level, and enjoy!

The receiver supports wired or wireless earbuds and headphones. Plug wired earbuds or headphones into the standard 3.5 mm headphone jack or connect wireless earbuds or headphones to the device (see above Connection Settings).

Please note: using wireless Bluetooth can increase latency.

The device display will auto-timeout after 15 seconds. Tap the power button to turn the display back on.
