Premium Digital and Reading Glass Collection
with **BluePro Technology**

Caring for your eyes never looked so good!

Inspired by the style and quality of optical frames, the Polinelli® collection combines bold, Italian style with BluePro Technology for a better digital experience. Plus, each piece features UV400 protection, reducing glare for visual clarity.

Lens Technology & Construction

Patented Blue Light Blocking Technology*

Patented lens coating that blocks approximately 30% of potentially harmful blue light** to help provide a better digital experience.

3 Layers of Anti-Reflective Coating

Virtually eliminates glare and allows for enhanced performance, clarity and increased visual sharpness.

UV400 Lens Protection

Helps protect the eyes from harmful UVA/UVB rays which can cause serious eye problems.

Polycarbonate Lens

Provides excellent optical quality†. Super thin lens is extremely lightweight and more comfortable than regular plastic lenses and is impact-resistant.

* Covered under U.S. Pat. No. 8,360,574. Other US and foreign patents pending. †Optical quality refers to the magnification of the lens.

** Harmful blue light refers to the 415-455 nanometer range of the visible light spectrum. The percentage represents the average amount of harmful blue light blocked at 5 nanometers increments in this range across all diopter strengths

Why Choose Polinelli® ?

- ③ Premium TR-90 material construction
 - Lightweight
 - Resists breakage
 - Maintains molded shape without core wire
- ③ European spring hinges
 - Added comfort
 - More customized fit
- ③ Case and cord
 - Complimentary neoprene slip-in case and color coordinated silicone cord included
- ③ Broad range of diopters
 - Targets a wider consumer base
 - Non-prescription digital glasses available for younger patients & contact lens wearers
