

Lens Alignment Gauge

The precision grids on this non-marring acrylic gauge allow for checking of lens alignment in mounted eyewear.

- Made from non-marring acrylic
- Check lens alignment accuracy
- Grids are marked for measuring A, DBL, and seg-height

Assembly instructions:

1. Remove the protection tape from the Base
2. Align the bottom of the Measuring Grid with the front edge of the Base
3. Press the Measuring Grid and Base together
