PITCHING MACHINE (SENIORS)

Help your players truly understand ball movement and timing by changing ball placement and speed on your Hack Attack pitching machine.

Effortlessly work the ball around the strike zone with the inside/ outside adjustment feature.

This feature will allow you to center the first pitch without having to awkwardly move the machine or kick out the rear leg.

With the dial adjustments and the elevation crank working in tandem, the person operating this machine will easily be able to move the ball around and work the corners of the strike zone, providing the batter with top notch batting practice.

- For Senior Baseball practice.
- Emulates a live pitcher with speeds of 35-100 mph and a distance of 43'
- 3 wheel advantage design provides accuracy and speed with no wear
- Can be used with most regulation leather and practice balls including dimpled practice balls, whiffle and other soft practice balls.
- Can throw balls up to 380 feet for outfield practice.
- Sturdy steel frame reduces the recoil from each pitch while large transporting wheels provides for easy placement and portability.

Weight: 160 lbs with legs
Shipping dimensions: 32" x 38" x 43"
