Oily Waste Cans

Dispose of oil-soaked rags and prevent fires caused by stray sparks or spontaneous combustion

- Lid stays closed when not in use to isolate contents from fire sources and limit available oxygen
- Round construction and elevated base allow circulation of air around can to disperse heat and reduce moisture build-up and rusting
- Durable steel with a powder-coat finish provides chemical resistance
- Swinging carry handle for portability
- Warning label with pictographs reduces miscommunication
- Color identification helps segregate different types of waste rags and wipes or differentiate multiple work shifts or departments
- SoundGard™ models reduce lid closure noise for quiet-working settings
- Foot-operated models offer hands-free opening

Foot pedal provides hands-free opening. When released, cover self-closes to reduce oxygen and prevent a fire from starting.
