

5-Gallon, Polyethylene Dispensing Safety Can, Stainless Steel Hardware, Top Self-Close Brass Faucet, Flame Arrester, Red - 14540

Product Images

Short Description

- Non-metallic laboratory safety can
- Self-closing faucet
- Features pressure-relief cap with stainless steel flame arrester

Description

Nonmetallic Laboratory Safety Cans have all the benefits of Justrite's Type I polyethylene safety cans, with the addition of a self-closing faucet for easy dispensing. All fill spouts have a pressure-relief cap with stainless steel flame arrester. Hardware featured on the can top is stainless steel for maximum corrosion resistance and long life. The five-gallon size also features a vacuum-relief valve in the lid allowing liquids to flow smoothly. Justrite's unique patented, current-carrying carbon insert imbedded into the container provides for proper grounding.

Nonmetallic Tilt Cans have a faucet on top and the can rests in a sturdy metal cradle.

Specifications

Model No	14540
UPC	697841142718
International Model No.	14540
FM Approval	Yes
OSHA Compliance	Yes
Complies with NFPA Code 30	Yes
Color	Red
Material Specifications	Polyethylene
Dimensions, Exterior	17" H x 11.5" Outer Dia. 432mm H x 292mm Outer Dia.
Capacity	5 gallon
Liter Capacity	19
Fill/Pour Hole inch	1.45
Fill/Pour Hole mm	37
Net Weight, lbs	7.5
Net Weight, kg	3.4
