914761	Lap Blanket with Hand Warmer - NEW	Universal	Ea.

Main Uses

A special problem that the elderly are faced with is diminished efficiency of blood circulation especially to the extremities. This condition is further exacerbated by diabetic conditions. As a result, many residents are more comfortable with blankets or sheets that cover their hands and feet. This universally sized lap warmer fits over the residents lap to capture the body heat. There are two sheepskin lined pockets for the hands and the cozy cloth lap warmer is lined at the bottom with sheepskin fabric. For convenience, there is a pocket to store personal items such as glasses. Easily attaches with two Velcro® straps.

Selling Strategy

- Provides warmth to lap, hands and feet
- Two hand warmer pockets and one utility pocket
- Covers entire lap and is universally sized
- Attaches to any wheelchair
- Manufactured from soft cozy cloth fabric and lined with synthetic sheepskin
- Launderable
