

# TIRE INFLATION CAGES

**The Original**

**Tire Inflation Cages**

We understand that safety is a priority and all of our cages are constructed with safety in mind. Branick uses only the highest quality, 2 1/4" diameter, high-yield steel tubing that has expansion properties to ensure strength and durability.

**All Branick inflation cages meet or exceed the requirements of OSHA Standard No. 29 CFR Part 1910.177.**

The arched tube design is engineered for maximum energy displacement and all our 54" cages can handle super-singles! Add the No-Mar Mesh option for ultimate safety and, to improve efficiency, add the Blockhead Auto Inflator and the 210 Cage Rollers.

**Rim saving "No-Mar" poly side strips!**  
(optional on all 4-bar cages)
