

Reduce Buffing and Increase Throughput With DeVilbiss® Dirt Control Floor Coat

Benefits

- Reduces airborne particles in the spray booth by over 50% and traps them on the floor
- Significantly reduces buffing time caused by dirt in the paint job
- Ideal for shops spraying waterborne as increased air movement and low humidity are required

Easy to Use

- Fast and easy once-a-day application using a pump sprayer
- Simply sweep up the dirt and overspray with a broom
- One 5-gallon bucket allows for approximately 20 applications

Innovative

- Neutralizes particle's electrical charge, allowing them to stick together
- Traps particles on the floor, not on the vehicle
- Water-based, low VOC

Part No.	Description
803491	Dirt Control Floor Coat (5 gals.)
803492	2-gallon Pump Sprayer

Directions For Daily Use

All you need is

- Push Broom for booth floor
- Small Broom for edges, ledges, corners
- Large dust Pan
- DeVilbiss Dirt Control Floor Coat
- DeVilbiss 2-gallon pump sprayer

1.

Sweep the booth at the start of each day. For best results, sweep the booth out after every bake cycle.

2.

Apply a uniform coat with a pump sprayer.

3.

Repeat the above routine daily. In high-production shops, re-apply at the mid-point of each day.
