## **All GP Impact Sockets feature the GP "High Torque" Drive**

### **Benefits are:**

**Increased Strength** - Transfers the pressure from the thinnest part of the socket wall toward the thicker section, resulting in increased strength.

**Increased Torque** - Allows up to 20% more torque to be applied than on standard hex impact sockets.

**Easier Access to Tight Areas** - The shift in pressure allows us to reduce the socket wall thickness, increasing access to tight areas.

**Reduced Wear** - Our impact sockets grip the fastener across a broader contact area, reducing the chance of rounding off fasteners.

*GP "High Torque"  
drive offers many  
benefits.*

*All GP Sockets feature  
extra-large size markings  
for quick identification.*
