

74 Amp Hound

Amp Hound, designed to drastically reduce the time needed to determine the amount of current in a fused circuit. The Amp Hound can determine the amount of current in a fused circuit without removing the fuse. Not only will this save the time needed to remove the fuse, configure the tool, read the current and replace the fuse, it will also solve the problem of inadvertently resetting parasitic drains.

The Amp Hound also makes it possible to “sniff out” current in an entire fuse block in a matter of seconds. Some of its many uses include finding parasitic drain, measuring amp draws on hard to reach fuse boxes, quickly identify circuit locations by Amp draw, etc.

- Absolutely the fastest way to measure current!
- Find current in all ATM, ATO, and MAXI type fuses (most accurate on 5 -50 Amp sizes).
- Can detect currents as low as 5mA, easily find any parasitic drain.
- Never pull a fuse again to read the current.
- Audible beep instantly tells you if there is any current in any circuit and provides “No Look” effortless operation.
- Great for those under-dash fuse panels.
- The tool is battery operated with an automatic shut-off.
- Use standard test leads to touch the top of the fuse.
- Patent Pending.

76 Relay Circuit Pro

The 76 Deluxe 12/24 Volt Relay Tester is a tool that can test an entire circuit from the battery to the component in question, as well as determining if the relay itself is functioning properly. This tool gives the technician the ability to instantly determine the problem within a tested circuit. It will identify at the push of a button if a wire, a part, or a relay is defective, without the use of a multi-meter. If the technician wishes to gain more information about the problem, the tool also features easily accessible ports for use with other diagnostic tools. This tester also has other practical uses. Since the item can jump the relay, the technician can use it as a remote control starter in engine work like

compression testing, distributor or cam shaft adjusting, or to run the compressor during an A/C charge.

- Kit includes the tester, 6 popular relay connectors, 1 universal relay lead.
- Comes in a blow molded case with a high density foam insert.
- Works with both 12 and 24 volt systems.
- Patented.

63 Window Tint Meter

Measures the total amount of Visual Light Transmission (VLT) through a window treated with aftermarket window tint film.
