

Steps for Proper Tool Maintenance and Operation

USE THESE TIPS BEFORE RETURNING FOR REPAIR, FOR FURTHER ASSISTANCE
CALL (800) 431-3091.

1. Disassemble and clean NOSE components periodically or if the pintails do not drop out freely, use a pick to clean the jaw grooves. Wash components in mineral spirits or isopropyl alcohol. Apply a small amount of light weight oil to the JAWS and inside of JAW HOLDER prior to assembly.
2. To ease NOSE TUBE and NOSE PIECE installation, extend tool by squeezing actuating trigger.
3. DO NOT USE TOOL AS A LEVER if rivet pin tail is jammed while regripping. Instead, with releasing trigger depressed, push tool nose against work piece for the jaws to get a deeper grip.
4. If rivet pintail is stuck in tool after breaking, lightly tap nose against a hard surface while squeezing the releasing trigger, pintail should then fall out.
5. Before operating tool, make sure that all NOSE PARTS have been screwed in HAND TIGHT.
6. For long life of tool, do not continue to run tool at the end of travel.
7. The APR-175A should not be used at temperatures below 35° F. unless it is first brought to room temperature and cycled several times, normal use of the tool after warming should keep it warm enough for proper operation.
8. If tool will not reverse, remove NOSE TUBE and inspect for any foreign matter that might have caused jamming between JAW HOLDER and inside of NOSE TUBE.
9. Frequently check that nose components do not vibrate loose during operation.

* Included in APR-175A kit

Nose Pieces (actual size)

| | Huck P/N | Description | | Huck P/N | Description |
|---|----------|------------------------------------|--|----------|--|
|  | 202156 * | 1/8" for Trim Molding Pop Rivets |  | 202155 * | 1/4" Auto Split "T" Rivets |
