

CRUISE DRIVE (LATE 6 SPEED TRANS) MAIN CASE SEAL INSTALLER

H-D's new 6-speed transmission is a very stout piece of engineering, incorporating some of the best bearings made. These main case bearings are of such high precision that you must be very gentle when working in or around them. For this reason, JIMS has developed a driver style seal installer (not a pushing or pulling type, which could damage these bearings). This new tool installs the main seal to the correct depth, without applying any stress to the new precision bearings, or new seals. *For more details see No.786-IS instructions.*

No. 786 - Use on all 6 Speed Cruise Drive 2006 - present, and 06-present XL/Buell except 1125 & Blast.
